AVENTOS – Your perfect lift system

Use AVENTOS for smooth, flowing motion in your cabinets

The AVENTOS lift system programme brings perfect, silent and effortless motion to the wall cabinet area: Even wide flaps will open easily and close silently with BLUMOTION, a unique system for smooth and silent closing. The variable stop ensures that AVENTOS flaps always remain in the desired position. You will be amazed at how easy it is to use.

These fitting solutions for bi-fold, up & over, parallel, stay lift and smaller stay lift unfold many new design options. Satisfy your wishes by choosing AVENTOS for your wall cabinets.

AVENTOS HK-S

There are many good reasons why AVENTOS lift systems are a good choice for the wall cabinet:

Lift systems open upwards and provide an excellent view into the cabinet interior, which enables comfortable and ergonomic access to the items stored. The furniture-user keeps the freedom of motion, unhindered by the door.

Additionally, lift systems can offer a huge variety of design options for wide fronts. The visual effect achieved on the base units can often be replicated on the wall cabinets.

The AVENTOS lift system programme meets the most comprehensive standards including:

- High quality and stability for the lifetime of the furniture.
- Exudes perfect motion, very easy to open, has variable stop and closes silently and effortlessly.
- Simple and predominantly tool-free assembly and adjustment.
- A uniform and clearly-defined integrated programme.

Awards won by AVENTOS:

Motion that inspires

AVENTOS features comfort of motion

Easy to open
The opening action of lift systems has never been easier. Regardless of height and width, the front can be opened very easily.

Soft and silent
Using Blum's renowned soft closing function BLUMOTION, AVENTOS turns every opening and closing action into a fascinating experience.

Wide and strong
Thanks to Blum's sophisticated technology, extremely wide and heavy fronts of up to 1.8 m wide and 1 m high can be used without compromising on the unique experience of BLUMOTION and feather-light handling.

Designed for you
To match various preferences, AVENTOS caters to a wide range of design options: Wooden fronts, narrow, wide alu frames or combinations, everything is possible with AVENTOS.

Built to stay
Different from most other lift systems, AVENTOS variable stop mechanism ensures that the front always stays in the desired position. In conjunction with Blum's lifetime guarantee, AVENTOS combines great functionality with high quality – truly built to stay.

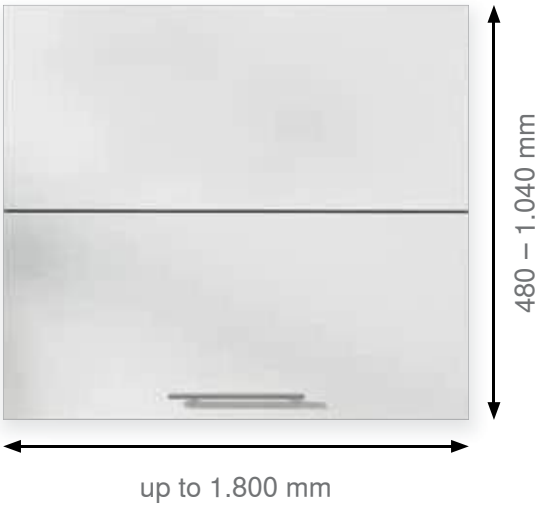
AVENTOS HF

For bi-folds,

AVENTOS HF

The AVENTOS HF lift system works with two part front wall cabinets. When opened, it simply folds upwards.

- Ideal for higher wall cabinets because the handle remains easy to reach in any position.
- Ideal in very high cabinet applications – the space requirement above the cabinet is minimised by the folding two-part fronts.
- AVENTOS HF can also be used with non-symmetrical fronts (2 different heights).



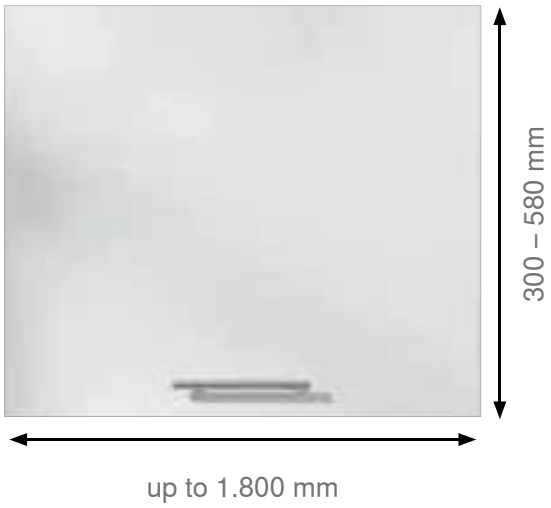
AVENTOS HL

For parallel lifts,

AVENTOS HL

With AVENTOS HL, the lift system opens vertically, making the cabinet interior completely accessible.

- Ideal for medium-sized applications and the upper half of tall cabinets. It can also be used in the mid-way area of the kitchen for storage of small appliances.
- Well-suited for small area, single-fronts.
- AVENTOS HL can also be used in low or shallow wall cabinets.



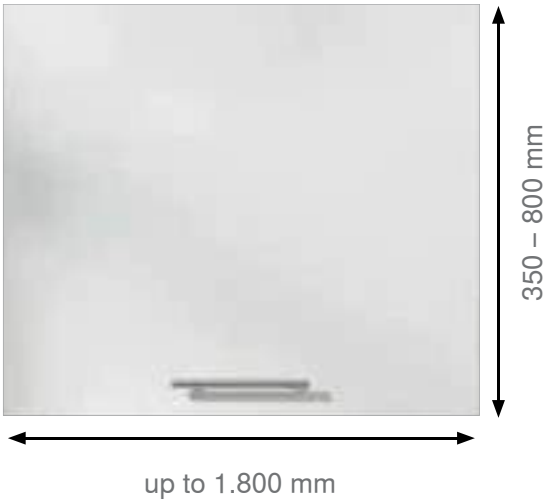
AVENTOS HS

Up & over,

AVENTOS HS

Choose AVENTOS HS when the front needs to swing up and over the cabinet.

- Ideal for large-area, single fronts.
- Only a small amount of space is required at the top of the cabinet due to the pivoting motion when opening.
- A cornice or crown moulding can also be used with AVENTOS HS.



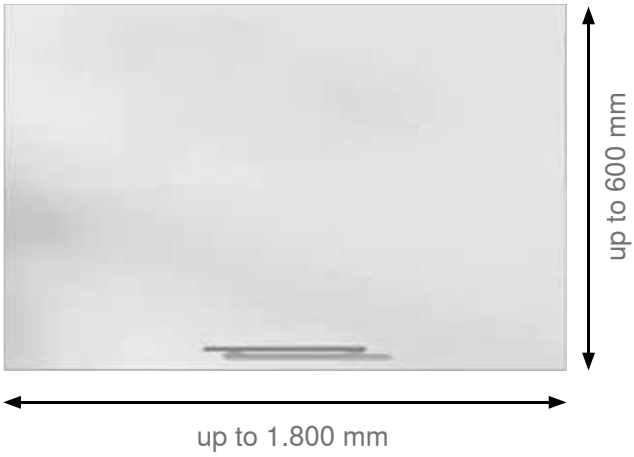
AVENTOS HK

For stay lifts,

AVENTOS HK

AVENTOS HK is well-suited in wall cabinets where there are height restrictions.

- An ideal solution for both low and high wall cabinets as well as top units for appliances.
- The pivot design of AVENTOS HK allows a minimum space above the cabinet.
- No hinges are required.



TIP-ON for AVENTOS HK

TIP-ON for AVENTOS HK, our mechanical opening support system, now makes handle-less stay lifts easy and comfortable to open.

AVENTOS HK-S

For smaller stay lifts,

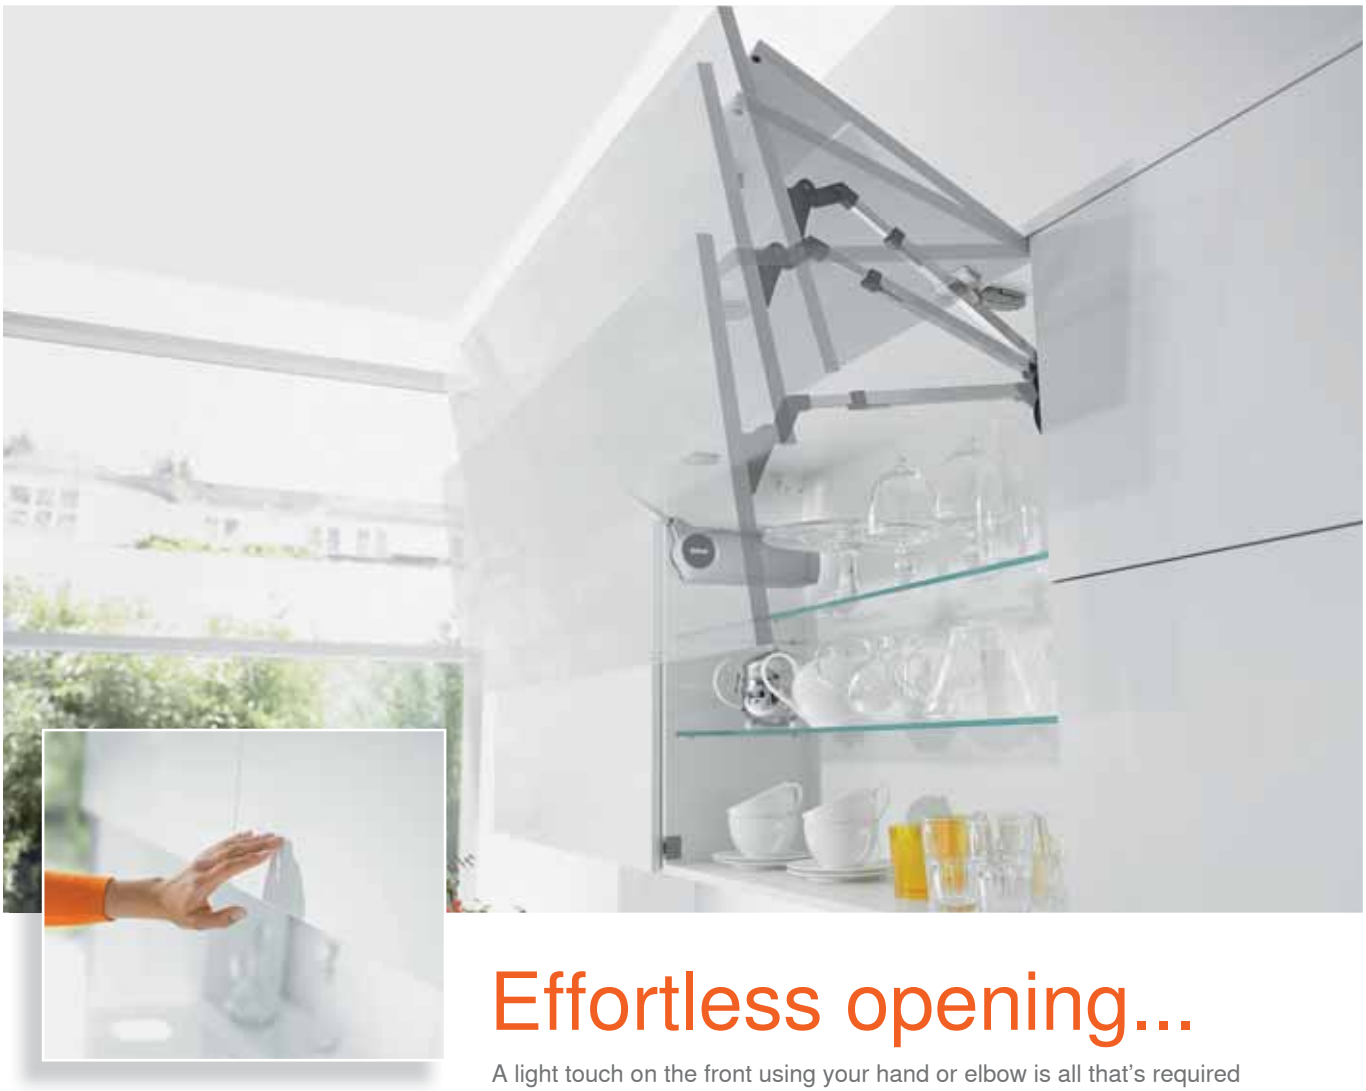
AVENTOS HK-S

AVENTOS HK-S is the ideal choice for small wall cabinets

- Perfectly suited for cabinets positioned on top of larder units and above appliances.
- The variable stop ensures that the fronts will stay open at any desired position.
- High levels of comfort are achieved through the integration of BLUMOTION for silent and effortless closing.

Cabinet width depends on power factor

SERVO-DRIVE for AVENTOS lift sytems



Effortless opening...

A light touch on the front using your hand or elbow is all that's required to open lift systems with SERVO-DRIVE for AVENTOS.

... and closing

Comfortable and easy closing: Provided by the easy to reach switch on each cabinet side.

SERVO-DRIVE for AVENTOS can be applied to selected AVENTOS lift systems such as AVENTOS HF for bi-fold lift system, AVENTOS HS for up & over, AVENTOS HL for lift up and AVENTOS HK for stay lift.

Our understanding of perfect motion

Blum turns the opening and closing of furniture into an experience that significantly increases the comfort of motion in the kitchen. Several thousand employees are continually working worldwide implementing our concept of perfect motion. Within this process, we place the needs of the kitchen user as the focus of our actions. We are only satisfied when the kitchen user is satisfied. All of our partners who participate in the furniture-making process profit from this focus.

For over 50 years, quality has been the highest principle for the development and manufacture of our products. Our fittings system shout “high quality” with their well-thought-out function, recognised design and high durability. They are designed to inspire and trigger fascination for perfect motion. We also set the bar very high for the services we offer. They must provide the best possible support to our partners.

To target our efforts at all levels, we are in a constant dialogue with kitchen users and regularly exchange information with furniture manufacturers, joiners and distributors.
