About Blum
84  Quality of motion is quality of life
86  Design
88  Services
92  The company
There are two sides to everything

Design
Furniture should be beautiful to look at and meet personal styles – no matter whether it has been designed to suit individual wishes or follow the general trend. Fittings systems by Blum work in the background to make furniture a success. Concealed within interiors they help bring your design ideas and latest trends to life.
... and function
Furniture needs to be functional, too, as top functionality is important to furniture users. This includes whether or not the furniture solution supports ergonomic flows, provides enough storage space and how comfortable it is to operate.
Lift systems
AVENTOS lift systems bring top quality of motion to wall cabinets. Fronts swing up and out of the user's way providing direct access to cabinet interiors.

AVENTOS boasts supreme user convenience. Even heavy fronts open with ultimate ease and close again softly and effortlessly with integrated soft-close BLUMOTION.

In combination with the SERVO-DRIVE and TIP-ON opening support systems, AVENTOS fittings can also be used for a handle-less design. This opens up many new design possibilities: Whether in the kitchen or another living area, for small fronts or large, AVENTOS ensures that lift systems can be opened with consummate ease.
AVENTOS allows you to create vertical and horizontal gap layouts.

- Bi-fold lift system: The two-part front folds up
- Up and over lift system: The front swings up and over the cabinet
- Lift up: The one-part front lifts up parallel to the cabinet
- Stay lift: The one-part front pivots up
- Small stay lift: The one-part front pivots up
- Very small stay lift: The one-part front pivots up

Form

- Widths up to 1800 mm and heights up to 1040 mm are possible
- Extra-wide elements are possible by combining several AVENTOS fittings
- Large fronts with or without a gap in the centre can be used
- AVENTOS cover caps are available in white, light grey or dark grey

Detailed information on the awards:
www.blum.com/award
**SERVO-DRIVE**

SERVO-DRIVE for AVENTOS: Handle-less fronts open at a single touch ...

... and close again at the press of a switch.

**Function**

- Heavy fronts open at a single touch with SERVO-DRIVE
- Fronts stay in the position required
- SERVO-DRIVE can be used for AVENTOS HF, HS, HL and HK

**TIP-ON**

Handle-less fronts open at a single touch with TIP-ON.

To close, simply press shut.

**Function**

- Simple one-touch opening
- Secure closing by pushing
- TIP-ON can be used with AVENTOS HK, HK-S and HK-XS
CLIP top hinges are available for many opening angles and overlay applications. They can be used with different door heights, thicknesses and materials as well as with glass and mirror doors. The 3-dimensional hinge adjustment feature makes it easy to produce a uniform and precise gap layout. Adjustment and fixing screws are nicely concealed by cover caps.

Doors close softly and effortlessly with soft-close BLUMOTION. The technology has been integrated into the CLIP top BLUMOTION hinge so it is concealed from view.
Form

- Design options are limitless, thanks to special hinges for glass and aluminium frame doors and many other special applications
- Various adjustment options are available to ensure a precise gap layout
- The hinges blend in harmoniously and inconspicuously with furniture interiors

Detailed information on the awards:
www.blum.com/award
Function

- Different opening angles provide easy access to cabinet interiors
- Even heavy doors open and close with ease
- The BLUMOTION feature can be deactivated for small or light doors
- Soft and effortless closing with BLUMOTION
- There are also special hinges for thin fronts

Top quality of motion for all angled applications from -50° to +50°

Enhanced user convenience for cabinets with inner drawers or pull-out surrounds with the CLIP-top 0-protrusion hinge.

Hinge and mounting plate for gluing – ideal for glass display cabinets.

Furniture impresses with thin fronts and proven Blum functionality.
Whether in the kitchen, living room, bathroom or office: drawers and pull-outs are a good idea in any room because they provide an optimal view and easy access to storage items.

Various box systems offer a wide array of design possibilities so you can easily meet individual wishes. The LEGRABOX programme is characterised by a sleek and straight-cut design. TANDEMBOX offers three different lines to choose from.

Blum's box systems all have a feather-light glide and integrated soft-close BLUMOTION, bringing top quality of motion to furniture throughout the home. Handle-less designs can be implemented with the SERVO-DRIVE electrical opening support system or the TIP-ON or TIP-ON BLUMOTION mechanical opening support systems.
Form

- LEGRABOX and the TANDEMBOX programme lines offer you a wide array of design options
- Different heights and designs, plus an incredible range of colours and materials, facilitate individuality at every level
- Extremely wide drawers and pull-outs are possible
- Handle-less furniture designs are possible
- Simple front adjustment is provided for a precise gap layout and clear lines
There are various different box systems available: high fronted pull-outs, inner pull-outs, drawers or SPACE CORNER corner cabinet solutions. Full extensions provide clear visibility for items and ensure access right to the back. Special inner dividing systems offer a wide range of application options. Even wide and heavily laden pull-outs open and close with ease. Easy opening of handle-less furniture ensured with a wide variety of different opening support systems.

Try not to use shelves in base cabinets. Box systems give you clear visibility and easy access.
LEGRABOX

LEGRABOX gives you a sleek, straight-cut design with clearly defined shapes and enhanced ease of use. 3-dimensional height, side and tilt adjustment of fronts produces a beautiful gap layout. Handle-less designs can be easily implemented with a mechanical or electrical motion support system.

Detailed information on the awards:
www.blum.com/award
**Slim design**

The new design of LEGRABOX supports the latest living trends and opens up new design possibilities throughout the home. The side panels are straight (inside and outside) and impressively slim (just 12.8 mm), blending in beautifully with all items of furniture.
LEGRABOX offers a multitude of design variants: LEGRABOX free allows you to individualise pull-outs with extensive design elements of your choice. Availability on request.

All components are coordinated in terms of colour and material.

Drawers and pull-outs can be implemented in various heights, lengths and colours.
TANDEMBOX intivo

The TANDEMBOX intivo programme line lets you personalise the design of pull-outs. You can opt for a sleek and classic design with BOXCAP, an add-on in the same material as the drawer side. Or pick a design element of your choice, e.g. leather or glass attached with a BOXCOVER. In other words, TANDEMBOX intivo gives you great freedom of design.

Detailed information on the awards:
www.blum.com/award
Personalised designs with a choice of design elements attached at the front and back with a BOXCOVER.

A seamless design with BOXCAP, an add-on in the same material as the drawer side.

Meet your customers’ individual requirements with design elements of clear or frosted glass – with or without printing.
TANDEMBOX antaro

Less is often more! This is where TANDEMBOX antaro comes into play. The components of drawers, inner drawers, high fronted pull-outs and inner pull-outs have all been colour coordinated. You can create a closed drawer box by adding design elements of various materials. The rectangular gallery underlines the minimalist design of cabinets.
TANDEMBOX antaro has a clear, rectangular shape – either with a gallery or as a closed drawer box with a design element.
TANDEMBOX plus

TANDEMBOX plus gives you great design freedom. Drawer boxes come in different heights, with closed sides or as gallery solutions, providing a wide range of applications. The programme line is characterised by a round gallery and uniform, grey nylon parts.

blum
Whether it's a simple gallery, double gallery or closed drawer box with BOXSIDE: TANDEMBOX plus makes many dreams come true.
Wooden drawers, made by carpenters or industrial manufacturers, narrow or wide, low or high:
Runner systems from Blum will win you over with their feather-light glide even when heavily-loaded.

You can use an electrical or mechanical opening support system to implement handle-less front designs. And drawers close softly and effortlessly with integrated BLUMOTION.
Runners are not visible to the furniture user
There is a wide range of application options, e.g. pull-out surrounds, small drawers or extremely wide pull-outs
Precise gap layout is no problem, thanks to simple front adjustment
Handle-less designs are possible
Function

- Low sag values and feather-light glide ensured even when heavily laden
- Full extensions give you clear visibility and easy access to all contents
- Easy to open handle-less fronts with mechanical and electrical opening support systems
- Soft and effortless closing with BLUMOTION
MOVENTO

The evolution of motion. MOVENTO takes Blum's tried and tested running action to the next level. The synchronised feather-light glide ensures top quality of motion. For all applications, from drawers and inner drawers to high fronted pull-outs and inner pull-outs.
MOVENTO is top in terms of quality, load bearing capacity and stability.

4-dimensional height, side, tilt and depth adjustment produce a precise gap layout.

The MOVENTO synchronised runner system offers a stable running action and feather-light glide.
TANDEM

TANDEM is Blum's tried and tested runner system for wooden drawers and pull-outs. Even heavily laden full and single extensions have a feather-light glide. The extremely good sag values mean that you can even implement extra wide and large pull-outs close to the floor.
Optional side stabilisation ensures that extremely wide pull-outs have a smooth and stable running action.

The Blum technology behind the feather-light glide: roller carriage runner with low-friction cylindrical rollers and a smooth transition between profiles to reduce noise.
Inner dividing systems

Blum’s practical inner dividing systems organise every drawer and pull-out. AMBIA-LINE for LEGRABOX or ORGA-LINE for TANDEMBOX and all runner systems: Items such as provisions or cutlery, bathroom items and accessories can be stored tidily and securely. Storage space can be put to optimal use and interiors tailored to individual needs.
Form

- A harmonious overall impression: Inner dividing systems carry the characteristic design of the box system through to interiors
- They include freely positionable containers and frames as well as flexibly adjustable lateral and cross dividers
- High-value materials such as steel, stainless steel and wood décor are available
**Function**

- Order is established in every drawer and pull-out throughout the home
- Storage is put to optimal use and interiors are tailored to individual needs
- Simple to handle and clean
- Everything where it should be and immediately to hand
- Practical kitchen accessories such as knife holder, film/foil dispenser, spice holder and plate holder are available
AMBIA-LINE for LEGRABOX

The inner dividing system for LEGRABOX is slim and elegant and beautifully organises interiors throughout the home. The flexible frames can be placed wherever needed and harmonise perfectly with the LEGRABOX drawer. They are simple to handle and versatile in application.
The various frames can be placed wherever needed in drawers.

Choice of materials and colours:
Either to match drawer sides or set distinctive styles in interiors.

AMBIA-LINE comes in steel or with wood décor.
ORGA-LINE for TANDEMBOX

The ORGA-LINE inner dividing system for TANDEMBOX works wonders on the interiors of drawers and high fronted pull-outs. Flexible cross and lateral dividers as well as full width and modular sets can be adjusted to contents. High-quality stainless steel trays provide clear visibility and easy access to all contents.
ORGA-LINE is a beautiful way to organise interiors. ORGA-LINE for drawers ensures that all kinds of items are kept safe and are easily accessible. Flexible cross and lateral dividers can be adjusted to contents. Bottles and cutting boards are easily accessible.
Fitting solutions by Blum should make furniture more practical, more convenient and easier to use. All of Blum's lift, hinge, box and runner systems are designed to meet this objective.

To this end, we have developed innovative motion technologies that not only make furniture more practical – they also offer a wide array of new design options.
Motion technologies
Form

- A wide range of new design options for modern furniture is available, including handle-less fronts.
- There is a high level of design freedom for pull-outs, fronts and doors.
- Soft-close BLUMOTION has already been integrated into all systems and is therefore concealed.
Function

- Pull-outs, wall cabinet fronts and doors open with ease with the mechanical or electrical opening support system
- Handle-less fronts open as if by themselves at a single touch
- Soft and effortless closing with soft-close BLUMOTION

Our opening support systems are available for these systems:
BLUMOTION, SERVO-DRIVE, TIP-ON BLUMOTION, TIP-ON.

BLUMOTION

Furniture closes softly and effortlessly with BLUMOTION no matter how heavy the pull-out, front or door and no matter how hard you slam them shut. The soft-close feature is integrated into lift systems, hinges, box and runner systems.
Doors don’t slam shut any longer – no matter how hard you close them.

Heavily laden drawers and pull-outs close softly and stay closed.

Even heavy wall cabinet fronts close softly and effortlessly.
SERVO-DRIVE

Fronts without handles are the latest design trend. It’s very easy to implement handle-less furniture with the SERVO-DRIVE electrical opening system. Wall cabinets, drawers and pull-outs open automatically at a single touch.

Detailed information on the awards:
www.blum.com/award
- Uniform technology, i.e. one system for all applications in wall and base cabinets
- Easy installation
- Safe operation
- Low power consumption
- Manual operation possible at all times
- Soft-close BLUMOTION
- 5-year warranty
TIP-ON BLUMOTION combines the advantages of the TIP-ON mechanical opening support system with reliable BLUMOTION dampening. One-touch opening. Close with an energetic push: the TIP-ON function is activated and BLUMOTION cuts in for soft and effortless closing. And the best part: the motion is assisted 100% mechanically.
... and box systems – both possible with TIP-ON BLUMOTION.

One-touch opening, feather-light glide, silent and effortless closing.

Runner systems ...

... and box systems – both possible with TIP-ON BLUMOTION.
TIP-ON

Whether it's stay lifts, doors, drawers, or pull-outs: Handle-less furniture can be used throughout the home thanks to the TIP-ON mechanical opening system. Close with a slight push or simply press shut.
Opening handle-less wall cabinet fronts is easy with TIP-ON.

Handle-less doors open at a single touch.

Reliable opening for drawers and pull-outs with TIP-ON.
The design and function of your furniture differs for each area of your home. Our comprehensive programme gives you a multitude of solutions to choose from – for kitchens, bedrooms, living rooms, bathrooms, hallways and shop fit-outs.
Living worlds
Kitchens

Merging dining and living space is very on trend. That’s why kitchen design is becoming more and more important. But kitchens need to be functional, too. This is where Blum comes in with its practical solutions.
Plates can be safely stacked and quickly carried to the table with Blum’s plate holder.

Application for bottles and cutting boards

AMBIA-LINE for cutlery
Kitchen furniture sees intensive use over the years. That is why high-quality fittings systems are so important. They ensure that kitchens can withstand the rigours of everyday use – for the life of the furniture.
AMBIA-LINE dispenser in drawers

The Blum sink pull-out makes perfect use of the storage space under the sink

Pull-out with AMBIA-LINE spice holder
Living rooms

Living room furniture should also be well-thought-out and practical. Beautiful design is not the only thing that counts. It’s important to use every inch of storage space available and provide easy access to contents.
The fixing system for thin fronts for lift systems, doors and pull-outs makes minimalist furniture design simple.
Bedrooms

Soft-close BLUMOTION is ideal for bedrooms. Furniture closes softly and effortlessly and everyone gets a good night’s sleep. Enhanced user convenience is rounded off by high stability and smooth running action.
Bathrooms

Bathroom furniture and fittings have to withstand the impact of humidity. Zinc plated runners and nylon roller carriage runners offer the best protection against corrosion. In addition, you need furniture solutions that make optimal use of the storage space available. This is where wide drawers with short nominal lengths come in handy. And bathroom furniture closes softly and effortlessly with BLUMOTION.
Offices and hallways

Practical solutions promote efficiency in offices, and all kinds of items need to be stored and hung in hallways. High-quality fittings systems bring top quality of motion and enhanced user convenience to daily living spaces.
You can quickly find accessories in the drawers and pull-outs of a hall cabinet.
Shops

Shop fit-outs must meet special demands. The focus is on the beautiful and well-structured presentation of high-quality merchandise. You can easily personalise your design with high-quality Blum fittings and protect against unauthorised access with CABLOXX.
CABLOXX for storing and presenting merchandise.
DYNAMIC SPACE

Ideas from Blum for practical kitchens
Blum has been investigating the needs of kitchen users for years. The insights gained are used to develop new products that make opening and closing furniture simple and convenient. After all, furniture should not only look good, it should be practical, too.
Features of a practical kitchen:

Workflow – Convenience
Putting away items, preparing food and cooking meals – many chores need doing on a daily basis. To minimise the number of steps you have to take, arrange kitchen cabinets according to typical workflows. This creates work areas or zones. Items are stored right where they’re needed. And high-quality cabinet equipment and inner dividing systems provide easy access.
Planning in 5 kitchen zones

Dividing a kitchen into five zones shortens distances and makes workflows smoother. Use the Zone Planner to plan a practical kitchen with your customers.

SPACE TOWER, the clever cabinet solution, makes optimal use of the storage space available. Breakfast can be prepared easily without covering long distances.

www.blum.com/zoneplanner2
How to create more storage space...

+15%
+30%
+55%

Features of a practical kitchen:

Space – Optimisation
It’s important to have enough storage space so that everything is where it should be and immediately to hand. Regardless of the size of the actual kitchen space: Blum solutions help to optimise the available space, ensuring that individual storage space needs are met.
Features of a practical kitchen:

Motion – Quality
Kitchen furniture sees intensive use over the years. That’s why quality of motion and user convenience are so important. Blum’s solutions bring top quality of motion to kitchens. Furniture opens as if by itself with the SERVO-DRIVE electrical motion support system, pull-outs have a feather light-glide and everything closes softly and effortlessly with BLUMOTION.
Quality of motion is quality of life
Everything revolves around furniture users when we develop our fittings solutions. Their needs inspire us. That's how we come up with products that make opening and closing furniture a mesmerising experience. We strive to perfect motion, which is why our motto is 'Perfecting motion'.
Design

Blum’s fittings systems don’t just look good, they offer a multitude of design possibilities, too. Your concept might focus on horizontal composition, vertical harmony or the sheer expanse of fronts. Everything is possible with Blum. For Blum supports functionality and creative design.
With or without handles – great scope for design
Services for designers and architects
What are your challenges?
More and more demands are being made on the functionality of furniture, and design wishes are becoming increasingly individual. If you want to stand out from competitors, you need reliable products, the assurance that you can implement your ideas (which are the result of creative planning and practical design) and the certainty that everything will work perfectly.

How can we help?
We can provide you with carefully prepared information about the entire Blum product line. We would also be happy to give you personalised advice on choosing products and bringing your own furniture ideas to life. What is more, we are pleased to provide you with new sources of design inspiration.

What is in it for you?
You not only get an overview of Blum’s entire range but also important detailed information directly from the fittings manufacturer. The information is complete, error-free and always to hand. This saves you valuable time when tendering and specifying your projects.

Personal support
We are glad to answer any questions you might have and give you new ideas for planning and implementing your furniture designs. You will find your personal Blum contact and new inspirations for various living areas at www.blum.com/interiordesigners

Tender documents
You can focus on design. Our comprehensive tender documentation helps you implement your ideas.

You can order the tender folder from us or download the digital version of the specification texts yourself.

www.blum.com/interiordesigners1
The company Blum

Founded over 60 years ago by Julius Blum, Blum is a family-owned company that operates on an international scale. Its strategic business segments include lift, hinge and pull-out systems. All our product developments focus on perfecting motion.

www.blum.com
Blum in Austria and around the world
The company has seven plants in Vorarlberg, Austria, additional production sites in Poland, the USA and Brazil and 29 subsidiaries/representative offices. Blum supplies more than 120 markets. The Blum Group employs 7,300 people in total, 5,500 of whom work in Vorarlberg.

Global customer benefits
“Whether manufacturer, distributor, fitter or kitchen user – everybody should personally enjoy the benefits of Blum products” – that is Blum’s philosophy on global customer benefits.

Innovations
To support customers with innovative fittings solutions and secure long-term success for the company, we need to consistently invest in research and development, in plants and facilities and in employee training. With more than 2,600 patents worldwide, Blum is one of Austria’s most innovative companies.

Quality
Blum’s comprehensive concept of quality does not only apply to products. Services and collaboration with customers and partners should also meet the same quality requirements.

Environment
At Blum, we believe that responsible ecological behaviour has long-term economic benefits. The longevity of products is just one of many important aspects. Other important measures include the use of environmentally-friendly processes, the intelligent use of materials and prudent energy management.

DYNAMIC SPACE
Good workflows, optimum use of storage space and top quality motion are important features of a practical kitchen. Blum’s ideas for practical kitchens are designed to bring function, convenience and ergonomics to furniture interiors.
