MOVENTO 763/769
Lateral Stabilizer Installation Instructions

Installation

**Step 1 – Attach left and right pinion housings**
1. Insert locating pins into MOVENTO runner.
2. Press orange locking clips to lock into place.

**NOTE:** Recommended for opening widths 610 (24") to 1369 (53-29/32") wide

**Step 2 – Slide gear racks into pinion housings**

**Step 3 – Install gear racks**
1. Insert locating tabs into cut-outs on bottom of runners.
2. Slide backward to lock into place.

The rear bracket moves to accommodate up to 686 (27") length MOVENTO runners.

**Step 4 – Cut gear racks to length**

<table>

</tr>
<tr>
<td>769x6860x</td>
<td>712 (28-1/32&quot;)</td>
</tr>
</tbody>
</table>

**Step 5 – Install runners**

Minimum inside cabinet depth = setback + runner length + 18 (23/32")

**Step 6 – Cut linkage rod to length**

**Step 7 – Press pinion adapters into linkage rod**

**NOTE:** For use in frameless and blocked-out face frame applications with 305 (12") to 686 (27") length drawers.

MOVENTO runners will sit 2 (3/32") higher when using the lateral stabilizer in bottom mount applications, and may have to be raised for some bottom mount drawer applications using SERVO-DRIVE.

Dimensions in millimeters (inch equivalents as noted)
Step 1 – Remove locking clips and linkage rod assembly

1. Remove locking clips.
2. Slide linkage rod assembly left.
3. Pull forward on right side to remove.

Step 2 – Remove runners

1. Close drawer runners.
2. Slide right pinion adapter onto right pinion.
3. Slide linkage rod assembly left onto left pinion.

Step 3 – Remove gear racks

1. Press locking pin on top of front and rear brackets.
2. Slide left and right gear racks forward to remove.

Step 4 – Remove pinion housing

1. Use a flathead screwdriver to disengage orange locking clips.
2. Remove left and right pinion housings.

Step 5 – Remove pinion housing

1. Install locking clips on both adapters.

NOTE: Runner must be in closed position.
