Cleaning information

For Blum fittings

www.blum.com

Quality for the lifetime of the furniture

Blum fittings should give pleasure for the lifetime of the furniture.
We have put together some helpful tips to make cleaning them easier for you.

Damp cloth

The best way to clean your Blum fittings is as follows:

- Use a soft, lint-free cloth, a chamois leather or a sponge
- Ensure that the material you use to wipe the furniture with is just damp, not wet
- Always wipe the furniture again afterwards with a dry cloth
- If possible, use cleaning products intended specifically for materials such as leather, stainless steel etc.; otherwise, use only clean water
- Wipe off dirt as soon as it appears

No chemical cleaning agents

Observe the following when cleaning Blum fittings:

- Do not use steam cleaners
- Do not use cleaning agents such as abrasive cleaning powders, steel wool and scourers, as well as cleaning agents that contain acetone, chlorine, nitro thinners and solvents starting with "tri" or "tetra"
- Be cautious when using biological cleaning agents that often contain organic acids
- Do not store items like cleaning agents, baking powder, dishwasher products or table salt in a damp environment, as direct contact and vapours can cause various metallic surfaces to corrode.

Quality for premium furniture

All Blum products are subject to extensive quality tests.
They should give pleasure for the lifetime of the furniture.
We provide you with practical cleaning information.
