

AVENTOS top in eclipse black

Time for a fresh look

The new eclipse black colour option for the AVENTOS top family of lift systems unlocks completely new design possibilities. Whether used subtly with dark surfaces or boldly against

light-coloured materials, eclipse black lets you create furniture designs that are exceptional down to the last detail.

Your advantages

Diverse range

Design freedom

Proven Blum quality

Our range at a glance

AVENTOS HF top – for bi-fold lift systems

The new eclipse black colour version opens up new design options for AVENTOS HF top. Fronts with dark aluminium frames, for example, pair perfectly with black lever arms, or you can explore other material combinations and asymmetrical front heights.

AVENTOS HS top – for up and over lift systems

Large one-part fronts can be moved effortlessly with AVENTOS HS top, while leaving adequate space between the front and the cabinet top. The fittings are clearly visible when the front is open, so aesthetics matters: use eclipse black to add a striking detail.

AVENTOS HL top – for lift ups

AVENTOS HL top is well suited for cabinets that are positioned above and on worktops. For instance, electrical appliances can be elegantly concealed behind a front with a worktop mounted cabinet. The accompanying cross stabiliser rod is, of course, also available in eclipse black.

AVENTOS HK top – for stay lifts

AVENTOS HK top is the ideal solution for low ceilings, as the stay lift barely protrudes beyond the cabinet, even with large, heavy fronts. With eclipse black, these solutions are now available in a dark colour option.
