Innovation drivers

MERIVOBOX brings together four innovations: a platform for simplified manufacturing, a minimalist design for a unique look, a new cabinet profile for enhanced functionality and a well-thought-out assembly concept for easy implementation.

Offering variety has never been so easy. Discover the many options you have to satisfy your customers' wishes – with a single box platform. MERIVOBOX.

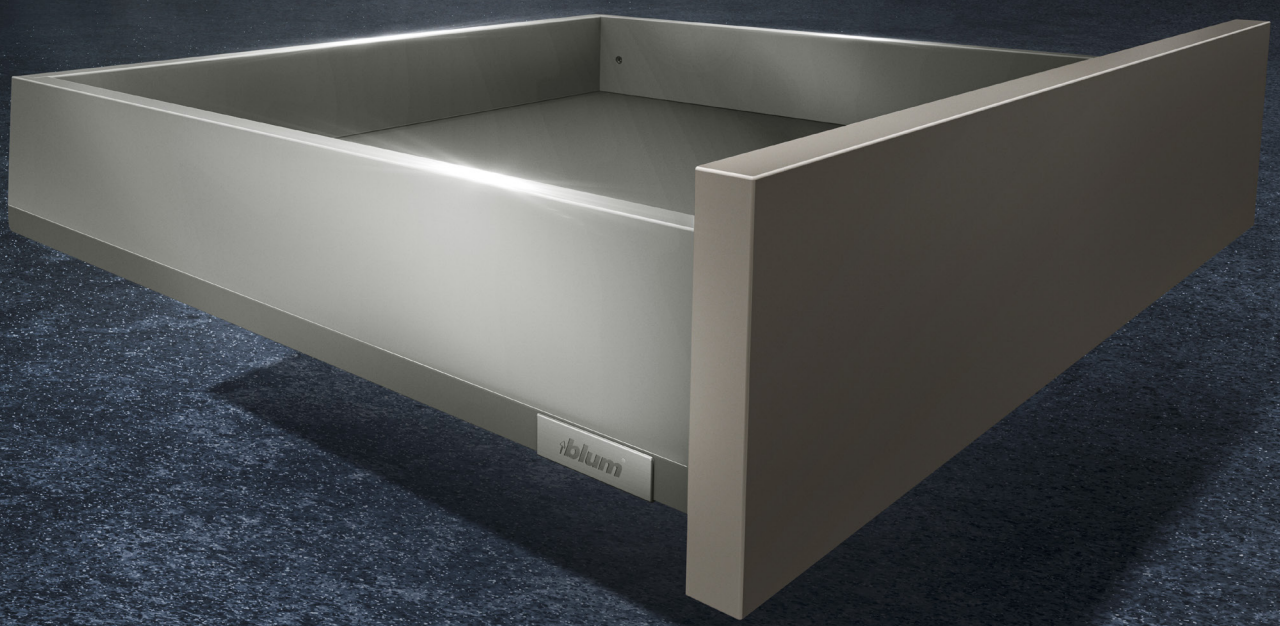

Platform
It takes just a few components to create your own extensive range. And you can make furniture manufacturing even more efficient at the same time. Diverse and yet simple.

Design
MERIVOBOX boasts straight lines and a striking look. Create your own diverse and unmistakeable range of furniture! Modern minimalism meets distinctive design.

Functionality
MERIVOBOX will inspire your customers for the lifetime of the furniture. The newly developed cabinet profile concept delivers extremely smooth running action and high load bearing capacity coupled with a feather-light glide and enhanced stability.

Assembly
A well-thought-out concept. No matter which model you opt for, assembly is always simple and adjustment always the same. It is extremely easy to achieve precise results.

Smooth transitions
Smooth transitions are a key feature of the well-thought-out design – for virtually seamless pull-outs.

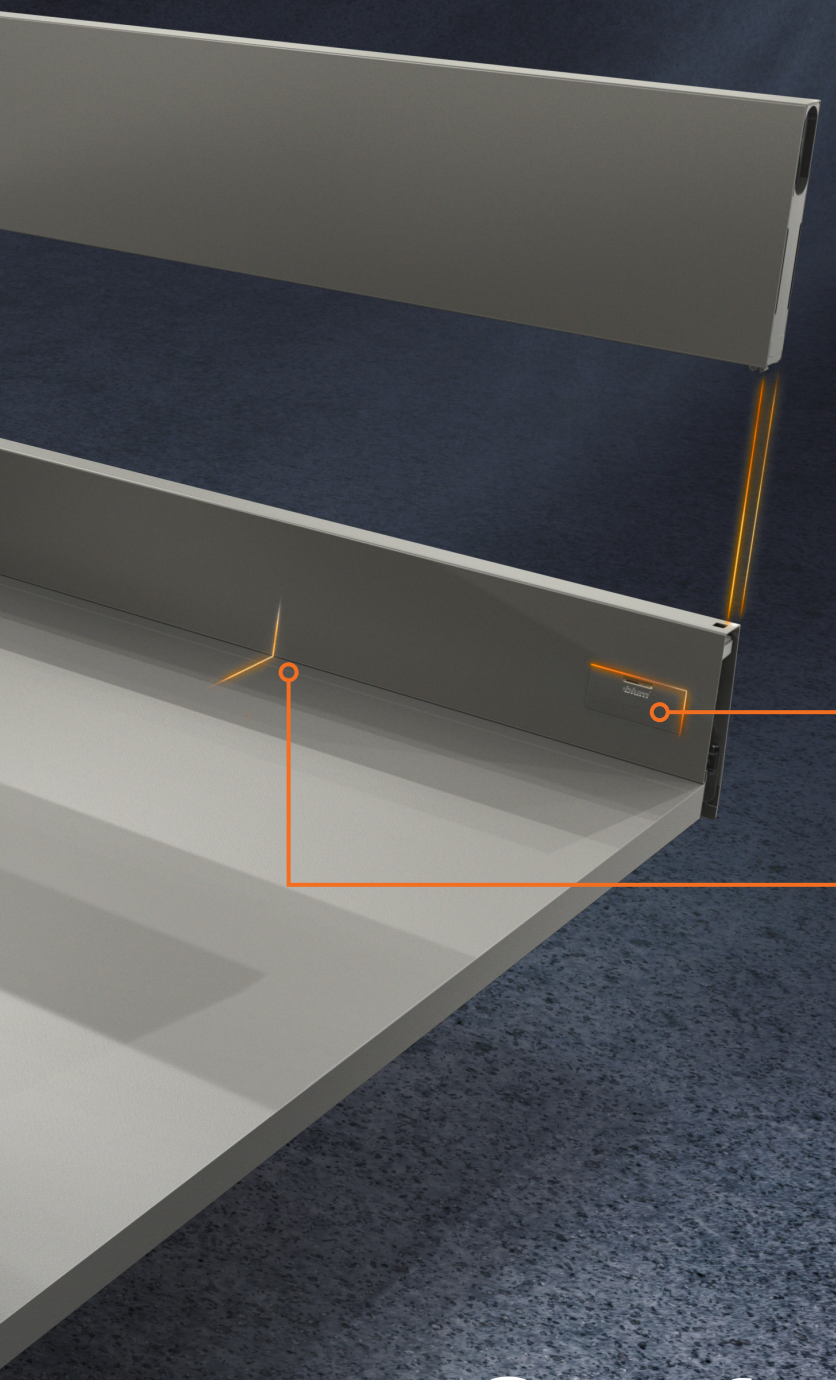

Exposed metal parts
Metal components and a coordinated colour scheme create a top quality look without any nylon components – even for the version with a gallery.

Distinctive drawer side design
The slim drawer side has a distinctive design line that creates exciting light reflections.

Branding element
Add your own branding to the drawer side – simply slide on the branding element for consistent positioning. Or not. Drawer sides have a sleek look even without a branding element.

Flush cover cap
The clear-cut design on the inside is rounded off by a flush cover cap. AMBIA-LINE beautifully organises interiors even with cover caps in place.

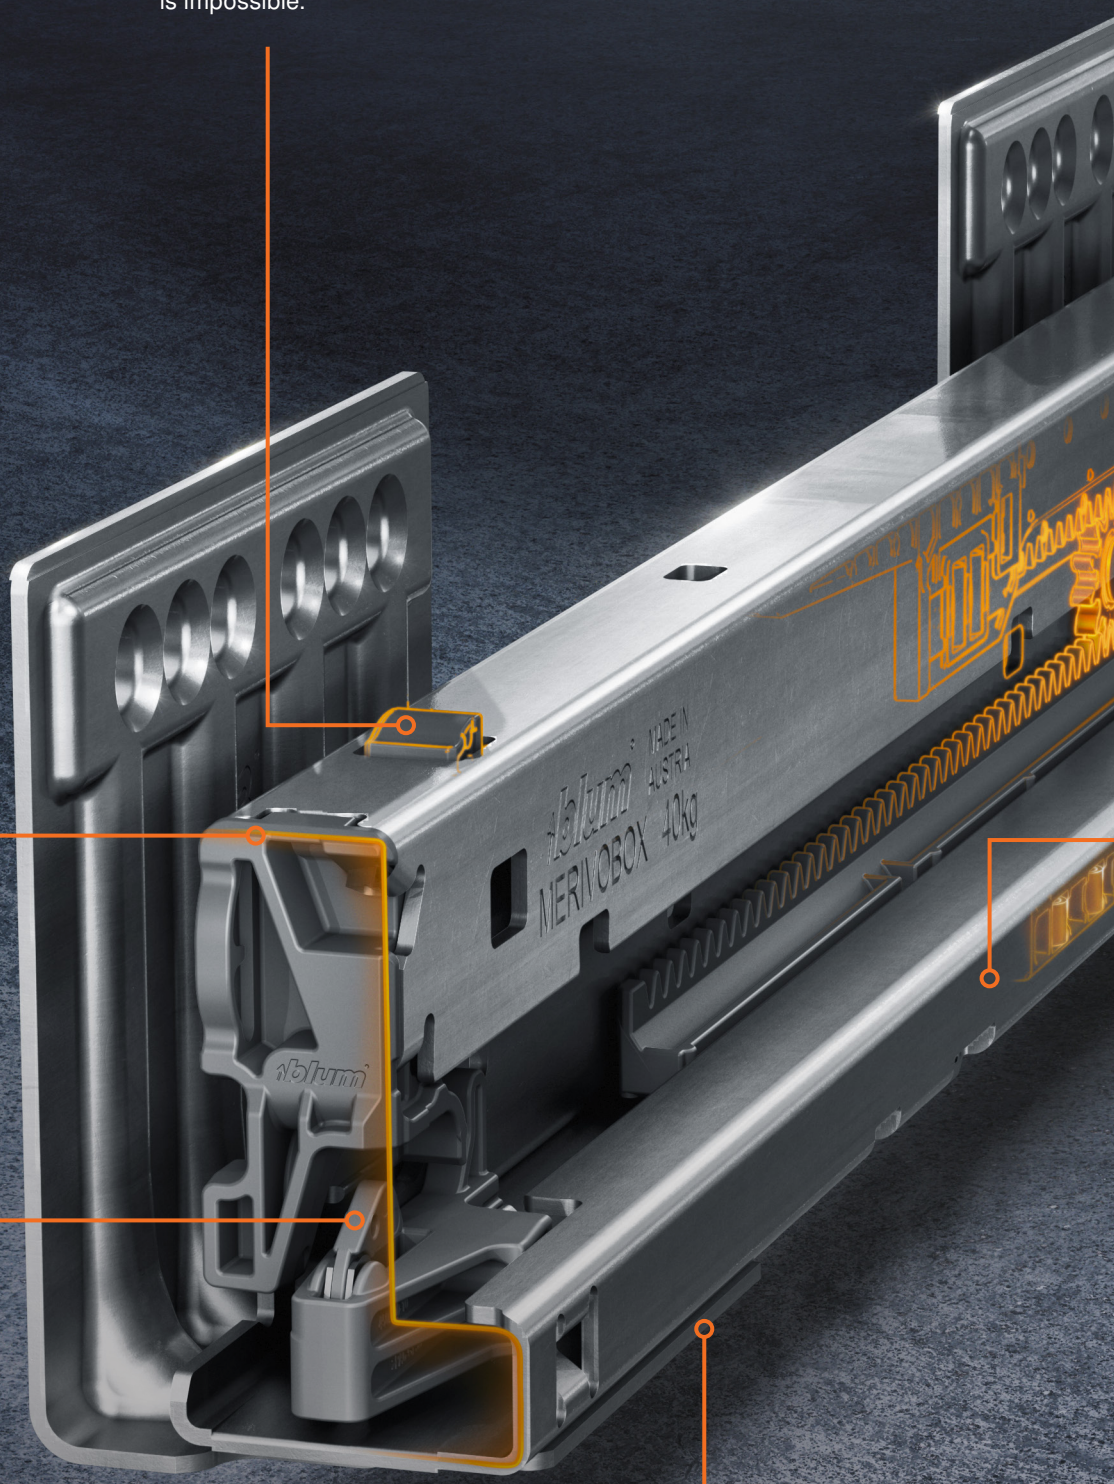

Straight on the inside
This enables you to use storage space right up to the edge. Combine with AMBIA-LINE to create stunning interiors and maximise the storage available.

Opt for a unique design

Pull-out stop
The integrated pull-out stop guarantees that the cabinet profile and drawer are connected securely. Accidental removal is impossible.

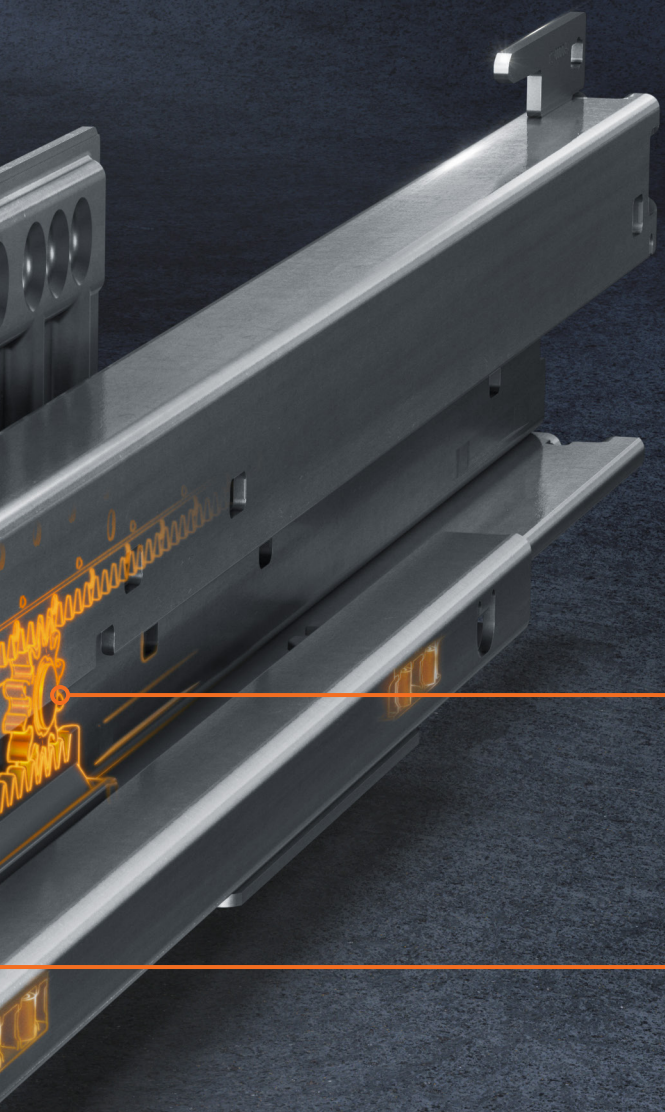

High front stability
The front attachment is extremely stable for both drawers and high fronted pull-outs. No additional stabiliser is needed even when implementing high cabinet fronts.

Vertical stability and full load-bearing capacity
The box system is exceptionally stable thanks to the unique L-shape of the cabinet profile. What is more, it has a high dynamic carrying capacity of 40 or 70 kg.

Stable front position
No matter whether empty or fully laden. Once adjusted, the gap layout will remain aligned to create a harmonious look.

Synchronised feather-light glide
Thanks to full synchronisation, pull-outs open with ultimate ease. The new box system is characterised by a smooth opening and closing action that will convince kitchen buyers.

Interface for optional components
Equip MERIVOBOX with motion technologies and side stabilisers to suit your needs – also possible at a later stage of the manufacturing process.

Benefit from impressive functionality

© 2026 Blum, Inc.

Tilt adjustment

You can adjust the front connector plate in just a few simple steps – no matter which pull-out side height you use.

Fast, reliable assembly and removal of fronts

You can easily insert the front thanks to the holding position, even when a pull-out is already in place. Very wide fronts can also be easily removed, even by a single person.

Use our EASY ASSEMBLY app to find answers to any questions you may have about assembly and adjustment.

Improve your efficiency with well-thought-out assembly

Every MERIVOBOX option can be implemented quickly and easily thanks to the consistent platform concept. The box system has simple, clearly labeled and easily accessible 3-dimensional adjustment options for side, height and tilt adjustment, which are the same for every drawer side.

Blum services

Your key to greater efficiency

What's the key to successfully implementing your projects? One factor is our high-quality products, and the other is the services we provide for them. They're precisely tailored to your needs along every step of your process chain, allowing you to work more efficiently and therefore save time.

Personal services
Direct contact for customer-focused support

Digital services
Digital support for greater efficiency

Logistics services
Optimised processes for fast delivery

Assembly devices
Practical tools for precise work

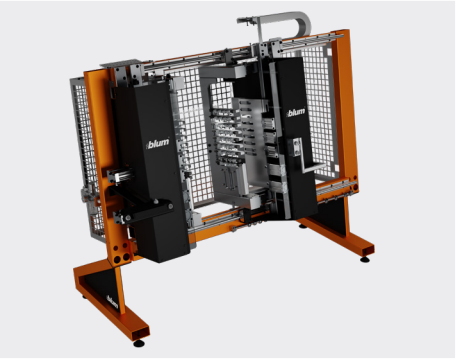

Communication services
Comprehensive material for targeted marketing
