AVENTOS HK-XS

Webcode
ID20200 ◀

for small or light stay lifts

- For many applications in tall and wall cabinets
- Light operating forces when opening and closing
- Variable stop
- Silent and effortless closing action due to combination with CLIP top BLUMOTION hinges
- TIP-ON function in combination with TIP-ON for doors and un-sprung hinges for handle-less furniture
- Low space requirement in the depth

Product overview

Blum AVENTOS HK-XS for many applications. Stay lift fitting with a minimum internal cabinet depth of 125 mm (with special drilling position of 100 mm). For wooden fronts, wide and narrow aluminium frames. Symmetrical lift mechanism with spring package. Lift mechanism can be used one-sided or two-sided. Convenient lift mechanism adjustment from the front. Lift system can be stopped in any position using variable lift mechanism strength adjustment. Simple, tool-free, quick assembly due to separate cabinet and front fixing bracket.

Can be combined with the mechanical opening support system TIP-ON. For cabinet heights from 240 mm to 600 mm. For cabinet widths up to 1,800 mm.

3-dimensional front adjustment: Height ± 2 mm, Side ± 2 mm, Depth ± 2 mm.

Finish nickel plated in steel. Cover caps are not required.
