ID20285 ◀

Plinth solution can be implemented with all Blum box and runner systems

- System-independent solution
- Can be implemented with all motion technologies
- Can be implemented with all Blum box and runner systems
- Different types of cabinet design

Product overview

Blum SPACE STEP plinth solution. Enables access to the next storage level up in wall cabinets. Can be used with BLUMOTION, SERVO-DRIVE, TIP-ON BLUMOTION and TIP-ON motion technologies. Creates additional storage space in the pull-out underneath the SPACE STEP.
The following box or runner systems can be fitted under SPACE STEP:

a) LEGRABOX heights N, M
b) MERIVOBOX in heights N, M, K
c) TANDEMBOX in heights N, M
d) MOVENTO
e) TANDEM

Activated by a weight of just 8 kg, the anti-slip system securely locks SPACE STEP in position when extended. The step surface can take a maximum load of 150 kg, provided the construction is suitable.
