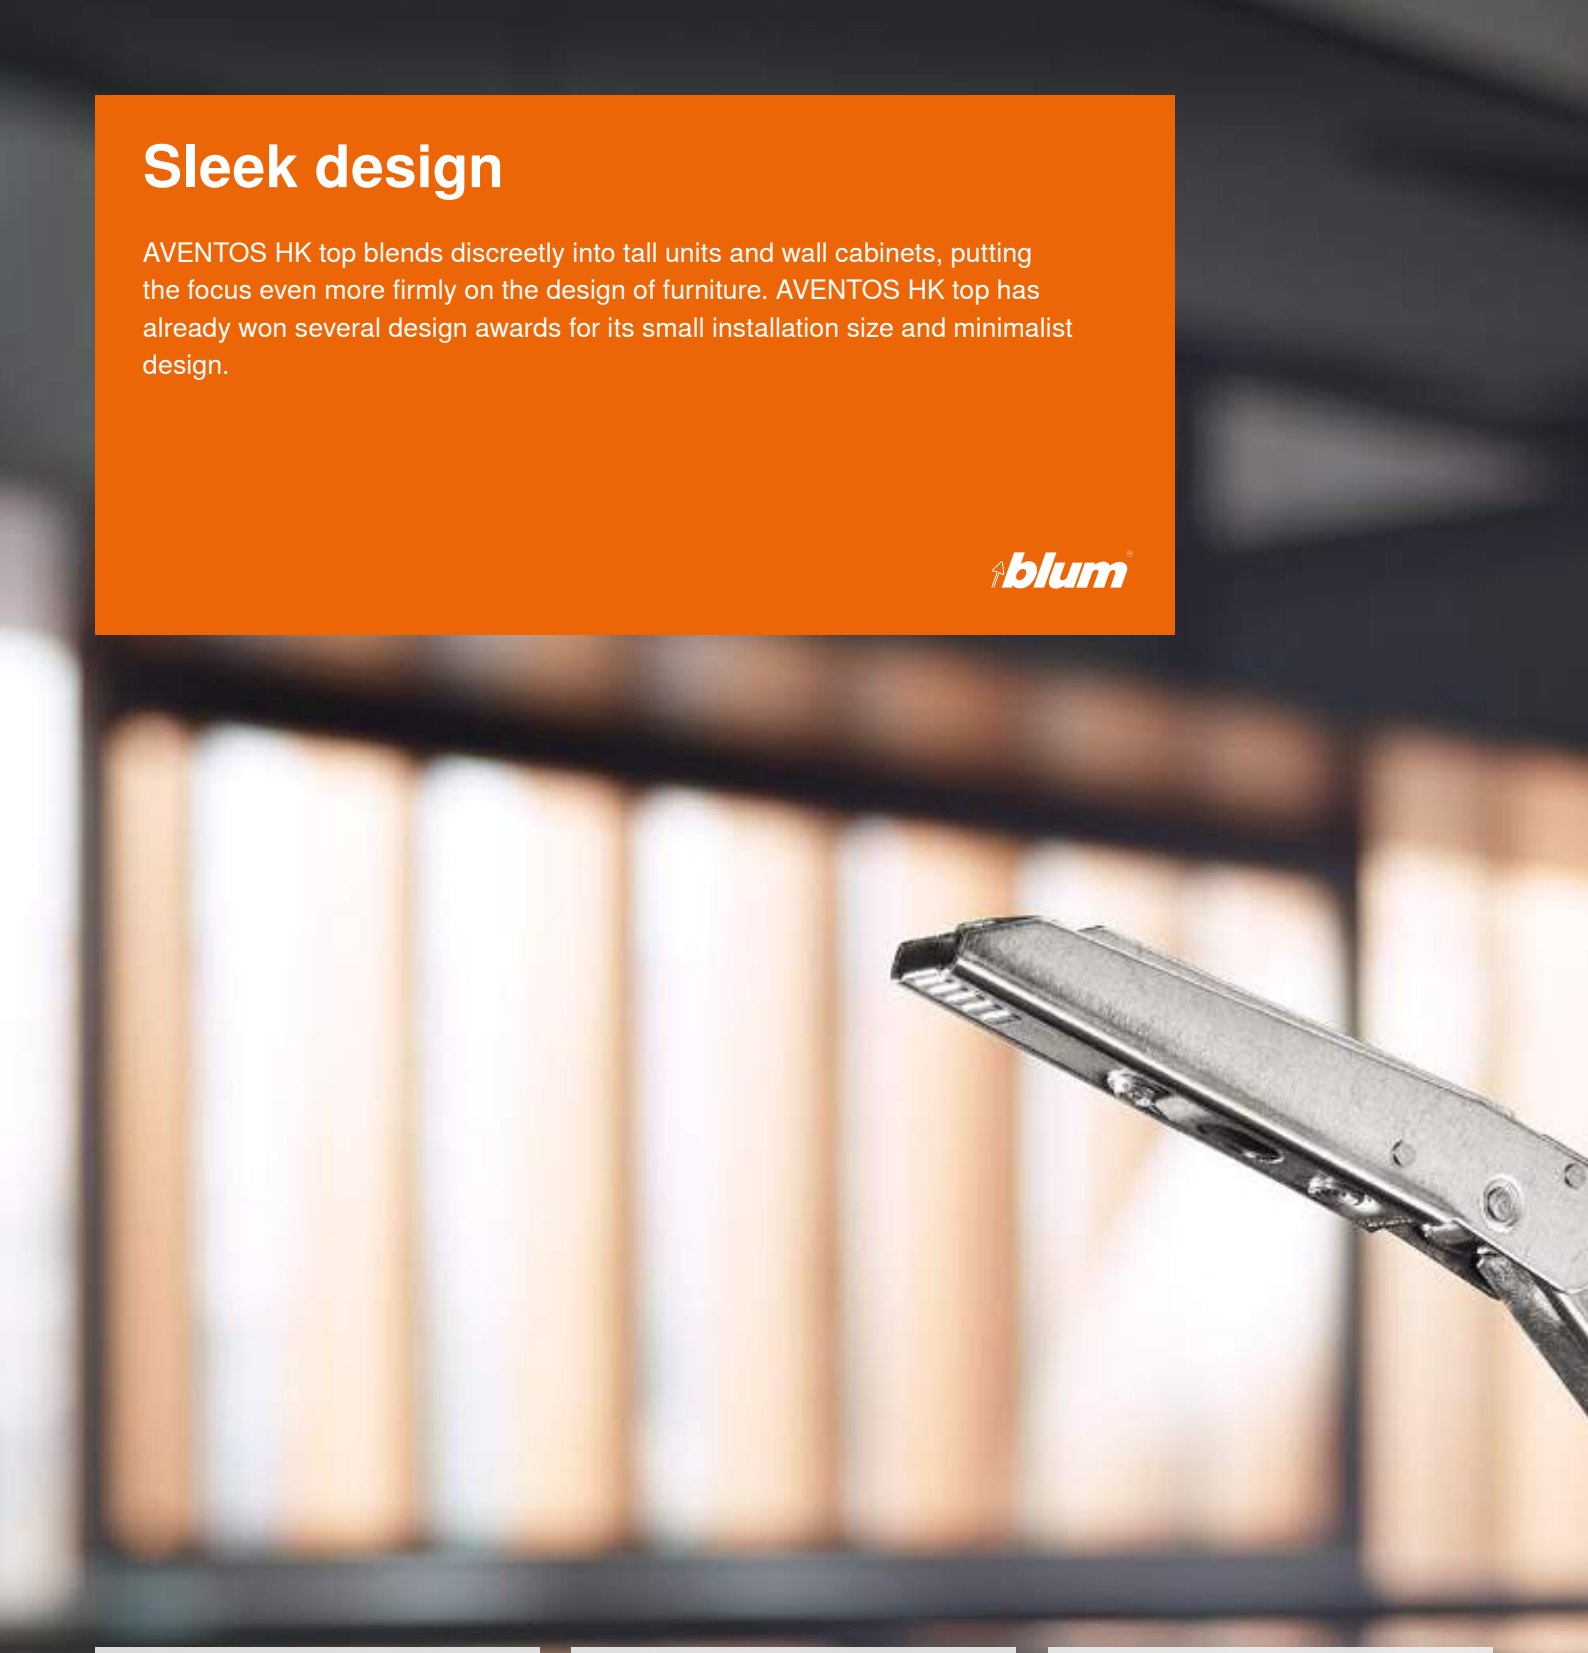
38 About Blum

Sleek design

AVENTOS HK top blends discreetly into tall units and wall cabinets, putting the focus even more firmly on the design of furniture. AVENTOS HK top has already won several design awards for its small installation size and minimalist design.



Small installation size

The size of AVENTOS HK top makes it ideal for small cabinets. But this compact yet powerful fitting is even suitable for large wall cabinets.

Minimalist cover cap

Linear design, harmonious proportions, smooth finish – the cover cap impresses with its minimalist look. With unique customer branding if desired.

Choice of three colours

Light grey, silk white or dark grey. Select the right colour cover cap to blend stylishly with your furniture, or why not introduce accents?

Integrated functionality

Every AVENTOS HK top component has been optimised in detail to pack top functionality into a small space. You can even feel the advanced technology at work: lift systems glide open with ease and close softly and effortlessly.

Variable stop
Adjust the lift mechanism precisely to the weight of the front and the stay lift remains exactly where you want it to, so it is always within easy reach.

Minimal opening forces
AVENTOS HK top boasts balanced opening forces regardless of the weight of the front. So even large and heavy fronts are easy to use.

Well-thought-out assembly

AVENTOS HK top has been designed to make assembly and installation precise and simple. You can choose between two different lift mechanisms – and consequently, two types of installation. Thanks to the new fixing position, drilling is the same for all applications and cabinet heights.

Further information about assembly.

www.blum.com/hktopassembly

Lift mechanism with positioning system

Simply position this type of lift mechanism so it touches the top panel and is flush with the cabinet face. No pre-drilling required.

Lift mechanism with pre-installed system screws

This type of lift mechanism is fixed to the cabinet side with two system screws and two pegs. It can even be installed before the cabinet is assembled. Simply drill four holes with a 32-mm spacing.

Optimised installation

Many useful features have been incorporated directly in AVENTOS HK top. As a result, the lift system can be mounted accurately, quickly and easily. The front gap layout and opening angle can be adjusted in no time. And the lift mechanism can be set from the front without having to remove the cover cap. This means that the lift system will stay open in any position desired.

Our EASY ASSEMBLY app provides all the information you need for quick and easy installation and adjustment.

> www.blum.com/eaapp

Easy front attachment

The marking template makes it quick and easy to correctly position the front fixing brackets. Attach template, set front overlay, position front, mark position. That's it.

Integrated safety mechanism

The innovative safety mechanism stops the lever arm from opening unintentionally, making installation nice and safe.

Adjustment using TORX screws

AVENTOS HK top is based on TORX technology. This provides optimum support for precise and easy adjustment.

Infinitely variable opening angle

AVENTOS HK top comes with an integrated opening angle stop. The opening angle is infinitely variable and can be set exactly as required.

www.blum.com/4formore

SERVO-DRIVE
by Blum

Electrical opening and soft close

Lift systems open at a single touch with SERVO-DRIVE. And close automatically at the press of a switch with integrated soft close.

Make your wall cabinets easy to use

Enhance the functionality of AVENTOS HK top by combining the lift system with a motion technology. A motion support system makes it even easier for your customers to open and close tall units and wall cabinets – with or without handles.

BLUMOTION
by Blum

Soft close
BLUMOTION ensures that fronts close softly and effortlessly – regardless of weight and how hard they are pushed shut.

TIP-ON
by Blum

Mechanical opening
Cabinets open at a single touch, giving you easy access to the opening edge of fronts. To close, simply press shut.

SERVO-DRIVE for supreme user convenience

AVENTOS HK top can also be combined with the SERVO-DRIVE electrical motion support system. Fronts open at a single touch and close at the press of a switch. What is more, the lift system still impresses with its small installation size despite the addition of a drive. Functionality at its best!

Easy drive unit fixing
After installing the lift system, attach the drive unit to the lift mechanism. It is simply clipped on without tools.

Assisted start-up
Colour signals on the drive unit and wireless switch take you through start-up step by step and confirm that settings are correct.

All kinds of installation situations

Small in size, AVENTOS HK top fits snugly into every cabinet, e.g. above refrigerators.

Thin fronts of 8 mm or more

The new EXPANDO T fixing system makes it easy to combine AVENTOS HK top with thin fronts. The fixing system can be used for wall cabinets, doors and pull-outs.

Fronts with wide and narrow alu frames

You can implement a wide array of fronts with AVENTOS HK top. No matter whether wooden fronts or fronts with aluminium frames – the choice is yours,

Diverse applications in kitchens

AVENTOS HK top blends discreetly into cabinet interiors and wows in performance. Wide tall units and wall cabinets can be implemented with ease to meet exacting design standards and produce harmonious gap layouts throughout the kitchen.

LOCASNLOVE

Diverse applications throughout the home

The more bespoke your furniture, the greater the impact. AVENTOS HK top gives you many possibilities to put the focus on customised solutions.

blum

Door thicknesses up to 30 mm

Thanks to AVENTOS HK top, you can even implement thick wooden fronts. And they will open with ultimate ease no matter how heavy they are.

Add punch to cabinet interiors

You have a choice of different colour cover caps, so you can either allow the small lift system to blend harmoniously with interiors or accentuate it and add punch to the colour scheme.

Freedom of movement

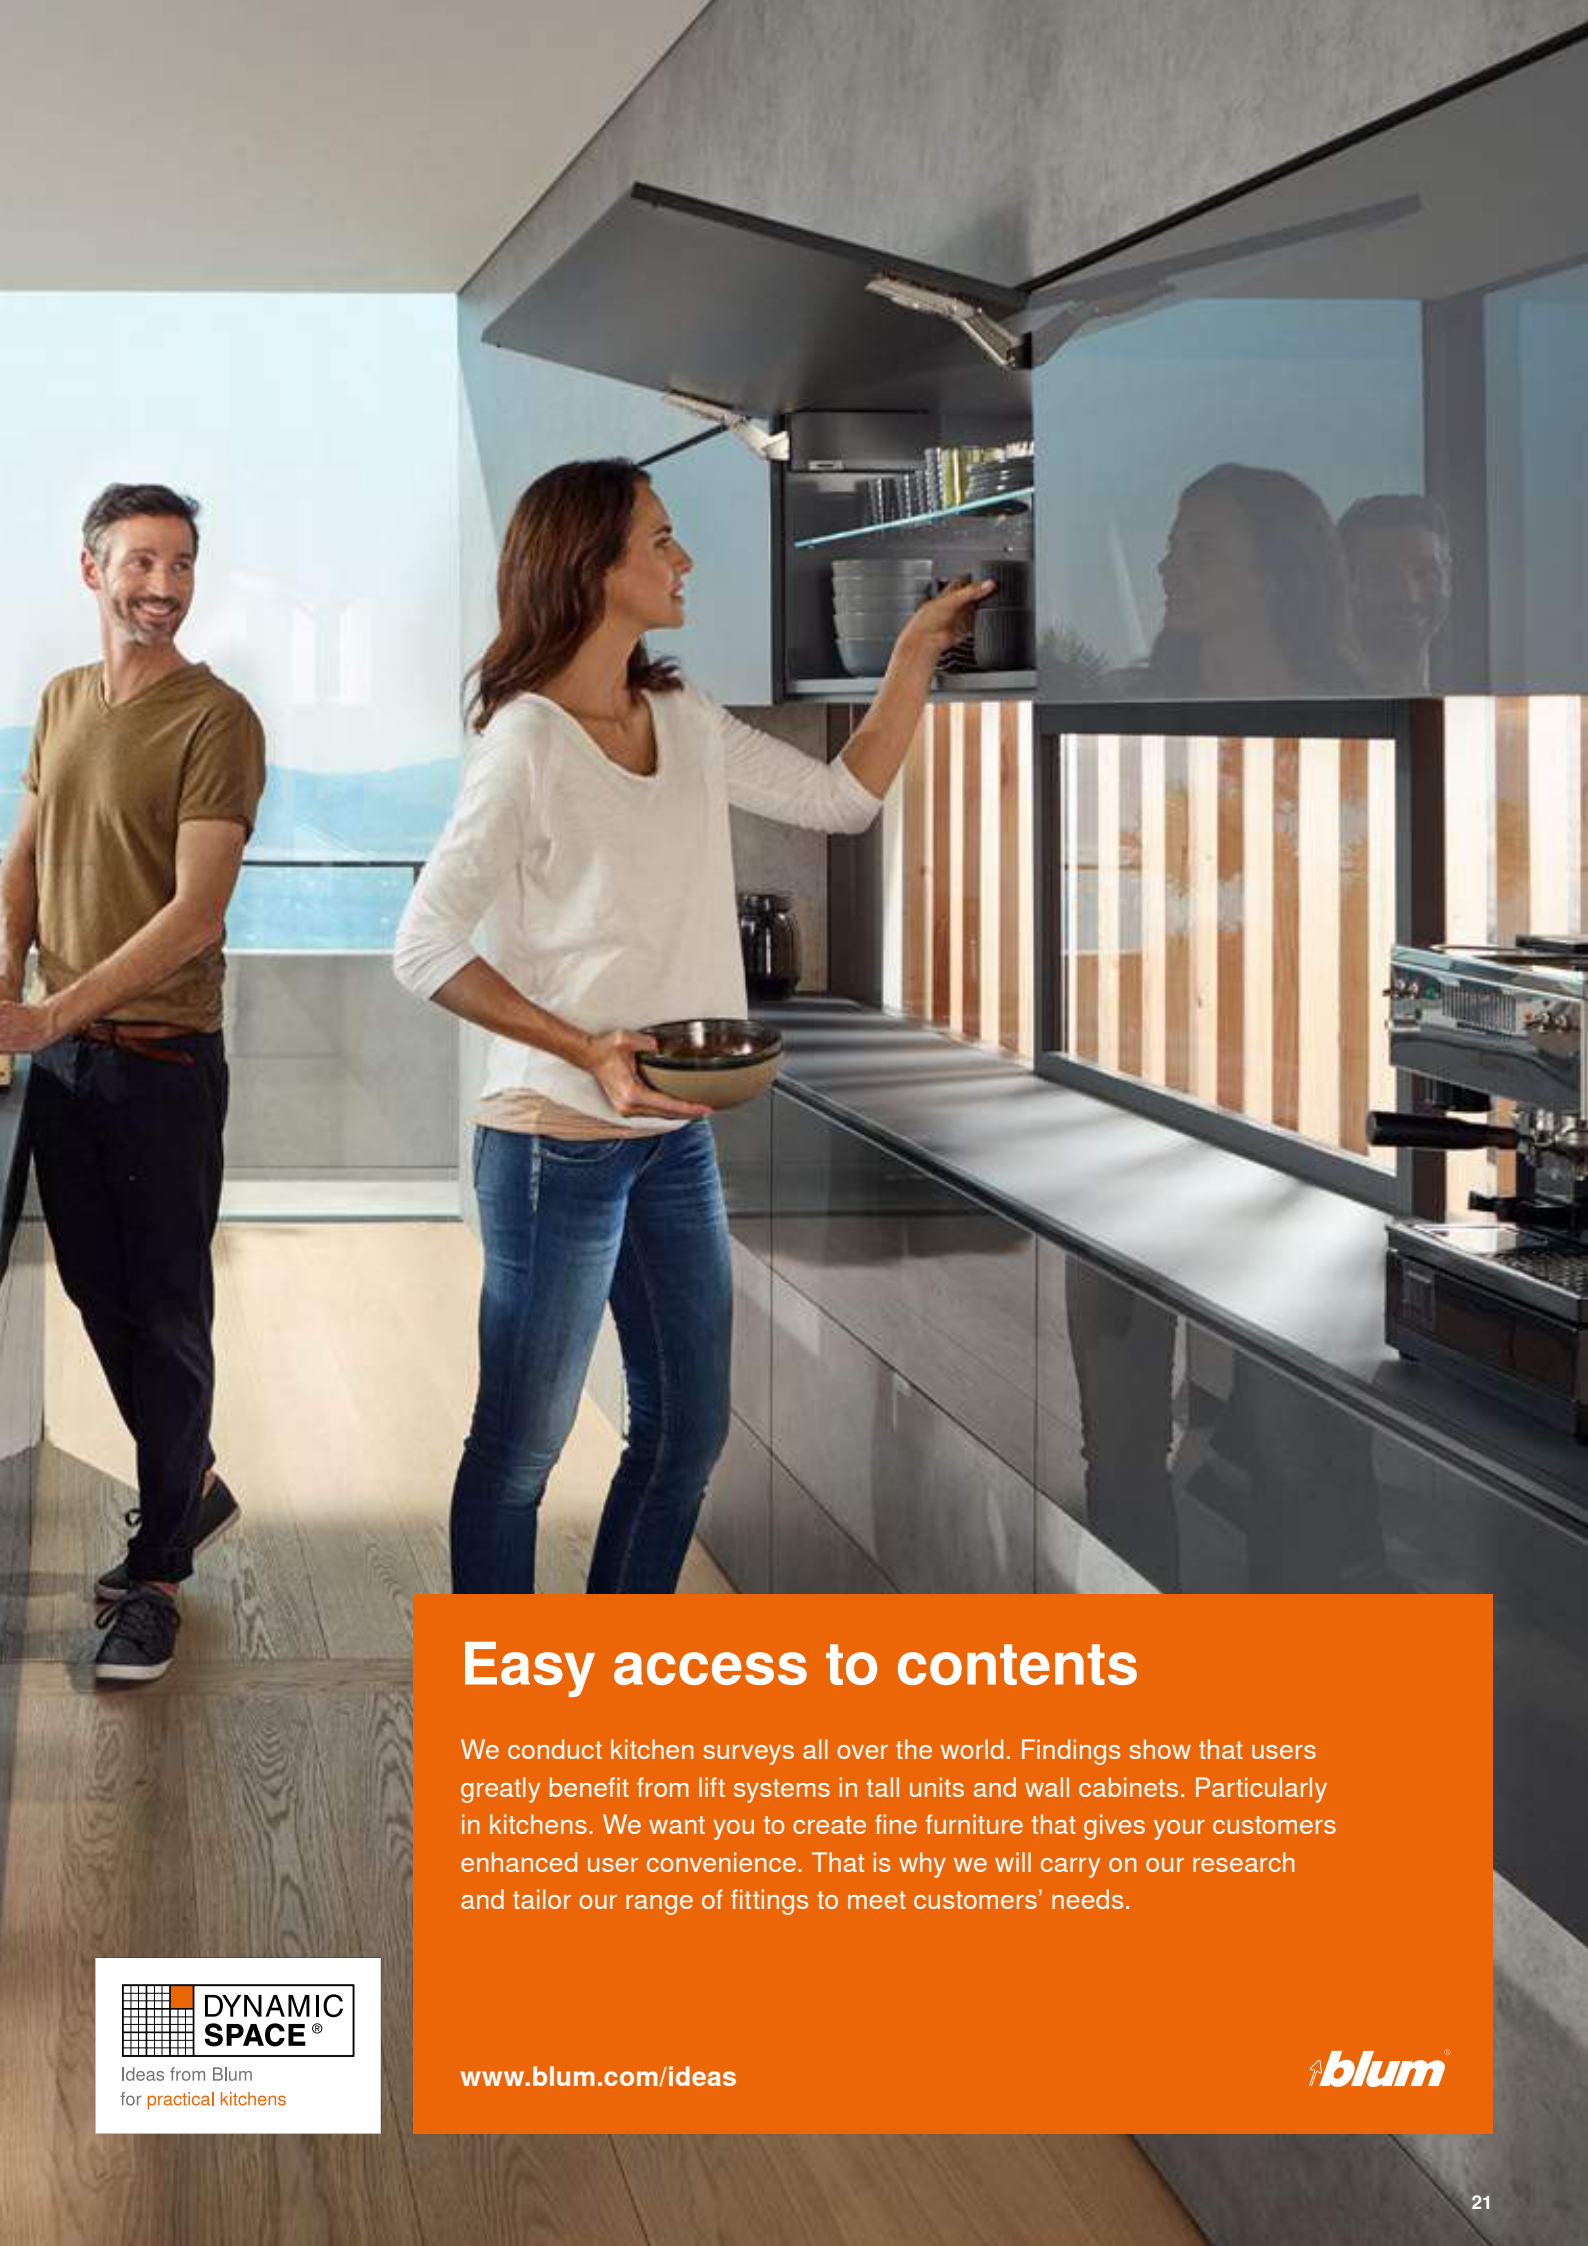
Fronts open up and out of the user's way. What is more, they hold in any position so they can even stay open during cooking. This means you have easy access to contents at all times.

Ample storage space

Tall units and wall cabinets equipped with lift systems come in all heights and widths. They can be tailored to storage needs or designed to produce harmonious gap layouts throughout the kitchen.

Top quality motion

Fronts open with a feather-light glide. Lift systems can be equipped with a mechanical or electrical opening support system as desired. Soft close is already integrated in BLUMOTION and SERVO-DRIVE.



Easy access to contents

We conduct kitchen surveys all over the world. Findings show that users greatly benefit from lift systems in tall units and wall cabinets. Particularly in kitchens. We want you to create fine furniture that gives your customers enhanced user convenience. That is why we will carry on our research and tailor our range of fittings to meet customers' needs.

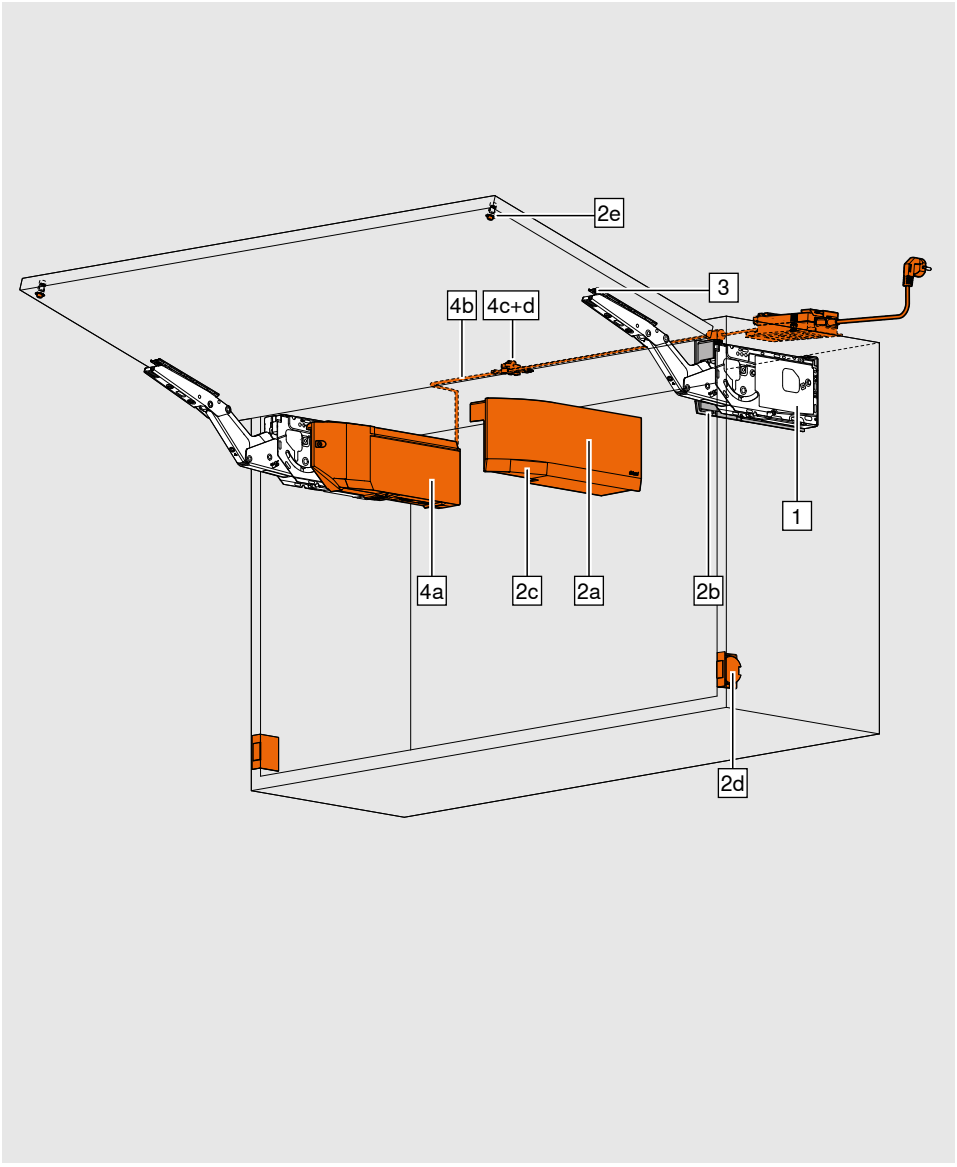
Standard and SERVO-DRIVE for AVENTOS HK top



Using the power factor, you can calculate the number of required lift mechanisms. The power factor required depends on the weight of the front (incl. double the handle weight) and cabinet height.

When using a third lift mechanism (a power factor increase of up to 50%), we recommend a trial application.

Note
We recommend an additional lift mechanism attached to the centre panel for wide cabinets. The reason for this is to prevent the middle of the front from sagging when open.

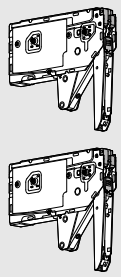
☐ Standard
■ SERVO-DRIVE

Power factor (LF) = cabinet height (KH) (mm) x front weight incl. double handle weight (kg)

A trial application is recommended at the edge areas of the individual lift mechanisms.

Order specification

1 Lift mechanism set



Symmetrical with pre-mounted system screws

LF	OW	
420–1610	max. 107°	22K2310
930–2800	max. 107°	22K2510
1730–5200	max. 107°	22K2710
3200–9000	max. 107°	22K2910

Max. front weight 18 kg for two lift mechanisms

Alternative

The company Blum

Founded over 60 years ago by Julius Blum, Blum is a family-owned company that operates on an international scale. Its strategic business segments include lift, hinge and pull-out systems. All our product developments focus on perfecting motion.

www.blum.com

Blum in Austria and around the world

The company has eight plants in Vorarlberg, Austria, additional production sites in Poland, the USA and Brazil and 31 subsidiaries/representative offices. Blum supplies more than 120 markets. The Blum Group employs 8.000 people in total, 6.000 of whom work in Vorarlberg.

Global customer benefits

“Whether manufacturer, distributor, fitter or kitchen user – everybody should personally enjoy the benefits of Blum products” – that is Blum’s philosophy on global customer benefits.

Innovations

To support customers with innovative fittings solutions and secure long-term success for the company, we need to consistently invest in research and development, in plants and facilities and in employee training. With more than 2.100 granted patents worldwide, Blum is one of Austria’s most innovative companies.

Quality

Blum’s comprehensive concept of quality does not only apply to products. Services and collaboration with customers and partners should also meet the same quality requirements.

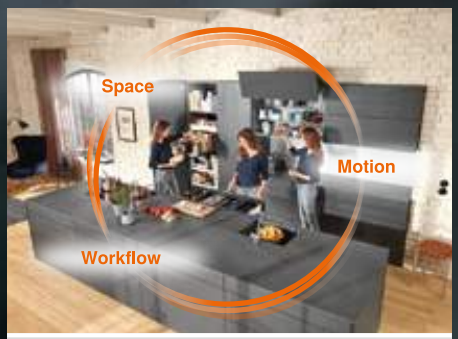
ISO 9001
Certified Quality System

Environment

At Blum, we believe that responsible ecological behaviour has long-term economic benefits. The longevity of products is just one of many important aspects. Other important measures include the use of environmentally-friendly processes, the intelligent use of materials and prudent energy management.

ISO 14001
Certified Environmental System

ISO 50001
Certified Energy System



DYNAMIC SPACE

Good workflows, optimum use of storage space and top quality motion are important features of a practical kitchen. Blum’s ideas for practical kitchens are designed to bring function, convenience and ergonomics to furniture interiors.
