We support you with data and services that are tailored to your processes. Let's work together to boost the efficiency of our operations.

Efficient support every step of the way: our services for distributors are designed to give you a helping hand – any time, anywhere. They cover every stage of your process chain, and all of them help you achieve your desired results more quickly and efficiently.

The whole is more than the sum of its parts

When it comes to providing you with the best possible support, we consider both sides: you benefit from our services in your processes and workflows, your customers benefit from services that they integrate into their online presence. This will enable you to expand your own range of services, make your digital presence more attractive and create tangible added value for your customers.

Complete integration

We aim to make it as easy as possible for you to integrate our products into your processes. That is why we tailor our services to suit your workflows, making sure that ultimately both you and your customers benefit.

Added value times two

Our goal is more than just customer satisfaction: we want to really inspire you with our products and services. That's why we offer not only high-quality products, but also additional services that generate tangible added value both for you and your customers. Interested?

A real partnership

The key to a successful partnership lies in smooth processes and close communication between you and Blum. The goal: to provide you with what you really need, for instance comprehensive product data for your communication channels and digital order processing.

Best possible support for your processes

For us, it is crucial that our distributors are able to seamlessly integrate our products into their value chain. To this end, we offer personal and digital services that will ultimately benefit both you and your customers.

Services with added value for your customers

As a distributor, we also provide you with services that benefit your customers – the manufacturers. These include configurators for straightforward product selection, handy calculators, assembly information in the form of graphics and CAD/CAM data.
