

Blum CAD/CAM data for every item

Support your customers during planning and manufacturing

www.blum.com

 **blum**[®]

Seamless assembly – with the latest CAD/CAM data from Blum

Make CAD and CAM data from Blum available in your web shop – directly on the product page, with no manual maintenance and always up to date.

Always up to date

With every request, our server uses Blum's identcode to fetch and deliver the most up-to-date CAD/CAM data for the product – driving precision in furniture manufacturing and efficiency across your operations.

Fully automatic updates

You don't need to manually maintain newly added or updated items. All new items and updates are provided automatically.

Straight from the manufacturer

The CAD/CAM data comes directly from Blum, has been checked by the manufacturer and is always up to date.

In your own style

You can customise the presentation of the web service to suit your requirements. You can also choose how to integrate the service – directly into the page, as an iFrame or an individual tab.

Many formats including 3D preview

We offer a wide range of CAD and CAM formats for almost all standard programs. The CAD data can also be viewed in a 3D preview.

Seamless assembly – with the latest CAD/CAM data from Blum

Make CAD and CAM data from Blum available in your web shop – directly on the product page, with no manual maintenance and always up to date.

Always up to date

With every request, our server uses Blum's identcode to fetch and deliver the most up-to-date CAD/CAM data for the product – driving precision in furniture manufacturing and efficiency across your operations.

Expand your range of services

Provide your customers with the CAD/CAM data that goes with every item and help them assemble Blum fittings.

CAD/CAM data for your web shop

You can display the latest CAD and CAM files for every Blum item and make them available for your customers to download using the corresponding identcode from Blum.

No manual maintenance needed

We take care of providing and updating the data via our infrastructure. Simply integrate the web service once and your customers will always have access to the latest manufacturer-checked data for every item.

Requirements

- PIM/web shop system
- Either the customer or service side should be capable of automatically generating encrypted product URLs. ⁽¹⁾

Seamless integration

You can integrate the web service into your web shop in whichever way suits you best – whether directly on the page, as a separate tab or in its own window. You can even customise the design to match your style.

Procedure

- We discuss the specifications of the interface with your IT experts.
- The interface is embedded in your web shop.
- After a test run, the CAD/CAM data flows seamlessly into your web shop.
- Your customers will always have access to the latest data on all products from Blum.

Want to find out more?

Please get in touch – your contact at Blum will be happy to help.

i

⁽¹⁾ This involves linking the URL to the corresponding Blum identcode and then encrypting it.
