# REVEGO

# Pocket systems for new space concepts

Ordering and planning information

www.blum.com

More and more people are merging their kitchen, dining, living and working space. This trend places high demands on modern living concepts. Pocket systems make it possible to quickly, easily and intuitively open up entire spaces when needed, and close them off again when not in use. This gives you completely new design possibilities for a wide range of applications.

Blum's new product category is the solution for optimum space utilisation: REVEGO pocket systems is a unique slide-in door system with sophisticated technology integrated into its own narrow cabinet — the pocket.

## Contents

1

- 06 Overview of product range
- 10 Planning approach and product selection
- 12 REVEGO duo, double door
- 24 REVEGO uno, single door
- 34 REVEGO uno + duo, single door and double door combined
- 50 REVEGO duo + duo, two double doors combined
- 62 Calculations and assembly of the profiles
- **67** EXPANDO T for thin fronts
- 68 Assembly devices
- 69 Testing and inspection regulations
- 70 moving ideas

#### **Efficient manufacturing**

REVEGO comes with all essential components thanks to the unique pocket construction with fully integrated technology. You can easily pre-assemble pocket systems in your workshop or at your plant, and transport them to end users in a carefully packaged state. This makes installation on site easier and increases efficiency.

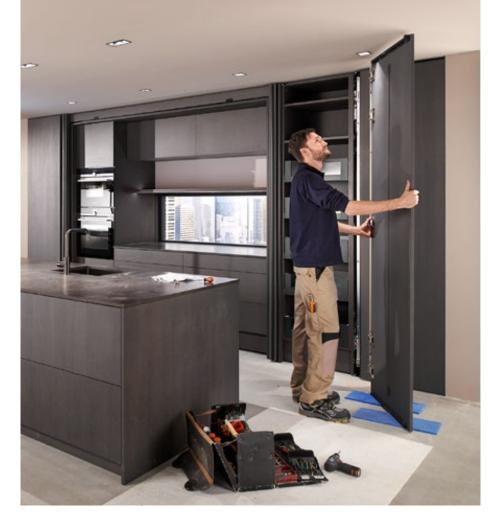

Experience full-size REVEGO. Download the AR application and get started:

www.blum.com/revarapp

#### **Rapid on-site installation**

Final assembly on site is simplicity itself: set up, align and mount the pockets; install the doors and track; make adjustments to the gap layout – and that's it! The 3-dimensional adjustment options are easily accessible and intuitive to use. And thanks to the integrated service interface, it is really simple to remove the fittings – even from built-in furniture.

#### Easy planning

Standardised pocket widths of 100 mm for REVEGO uno single door and 150 mm for REVEGO duo double door give you the freedom to design the furniture around the pocket exactly as you wish. Single and double door applications can be individually combined.

#### The ultimate in convenience

No need for handles thanks to TIP-ON motion technology; users can open cabinet doors with a single touch and slide them away completely into the pocket. To close off the space, the user simply presses the door to release it from the pocket and then presses it again to elegantly conceal the entire area.

# **REVEGO** at a glance

- Faster and easier installation thanks to pre-mounted fittings
- Unique pocket construction with fully integrated technology
- Easy planning thanks to predefined pocket widths
- Enhanced ease and mesmerising motion
- Individual design possibilities through the combination of REVEGO uno (1) and REVEGO duo (2)
- Different nominal lengths allow you to adapt applications to the installation situation
- Smooth opening and closing without a handle thanks to integrated TIP-ON motion technology
- Can be implemented with or without a plinth option
- Precise and easily accessible 3-dimensional adjustment options
- Full overlay fronts completely conceal the pocket when closed for a perfect gap layout
- Pocket systems can be used in all living areas
- Suitable for systems to conceal runs of cabinets or walk-in solutions such as dressing rooms or pantries, etc.
- Fittings can be easily removed (even from built-in furniture) thanks to an integrated service interface

#### Overview of applications and planning notes

## **REVEGO** duo

Double door, right or left

- Number of fronts: 2

- Installation width: 900 to 1500 mm
- Internal width within the application: up to 1350 mm
- Front width: 442 748 mm

### **REVEGO uno + duo**

#### Single door and double door combined

- Number of fronts: 3
- Installation width: 1350 to 2400 mm
- Internal width within the application: up to 2150 mm
- Front width: 442 748 mm and 442 898 mm

## **REVEGO** uno

Single door, right or left

- Number of fronts: 1
- Installation width: 450 to 900 mm
- Internal width within the application: up to 800 mm
- Front width: 442 898 mm

## **REVEGO duo + duo** Two double doors combined

- Number of fronts: 4
- Installation width: 1800 to 3000 mm
- Internal width within the application: up to 2700 mm
- Front width: 442 748 mm

#### Easy product selection

Our Product Configurator makes it easy for you to choose your products and provides checked parts lists, planning information and CAD data.

www.blum.com/revpc

## **Our services at a glance**

Our services support you every step of the way – from planning and design through to manufacturing and assembly. Take advantage of our tried-and-tested and user-friendly services for your projects with REVEGO.

Concept, planning and product selection

Our Product Configurator will help you select the right products quickly and efficiently. It gives you checked parts lists and planning information, as well as accurate production drawings.

#### Design

You can export REVEGO projects in various CAD formats for use in your own design software. Together with selected partners, we have also established interfaces for the straightforward transfer of data and completion of your project in your design software.

#### Ordering

Simply transfer your parts lists from the Product Configurator directly to the web shop of selected distributors. Your REVEGO configurations are easily saved to "My projects", where you can then manage your customer projects.

#### Manufacturing

Speed up your production process with our Product Configurator. Transfer the planning results to MINIPRESS top with EASYSTICK (using BXF) or directly to your CNC machine. In order to transfer the data to your CNC machine, you'll receive specially prepared CAM data (CAM DXF or complete WOP drilling programs) in the Product Configurator. This makes production processes on the CNC machine even quicker and easier.

#### Planning approach and product selection

#### Niche installation

Planning approach from outside moving inward with fixed installation width for the entire application. The space available determines the installation width and is decisive for the possible number of fronts, front widths and thus choice of application. The fittings and cabinet dimensions within the application are determined in the next step.

- 1. What recess width is available for the application? The recess width is the installation width for the application.
- Determine the possible number of fronts and front width based on the installation width. This will determine the type of application.
- The pocket dimensions, front protrusion and internal dimensions within the application can now be defined on the planning pages of the respective application; the appropriate fittings can be selected.

#### Free-standing installation

Planning approach from the inside moving outward with focus on the cabinet width and run of cabinets within the application. The cabinets to be concealed are the decisive factor for the possible number of fronts, front widths and thus for the choice of application. The installation dimensions and fittings are determined in the next step.

- What is the cabinet width that needs to be concealed? The cabinet width is the internal width within the application.
- Determine the possible number of fronts and front width based on the internal cabinet width. This will determine the type of application and its installation width.
- The pocket dimensions and front protrusion can now be defined on the planning pages of the respective application; the appropriate fittings can be selected.

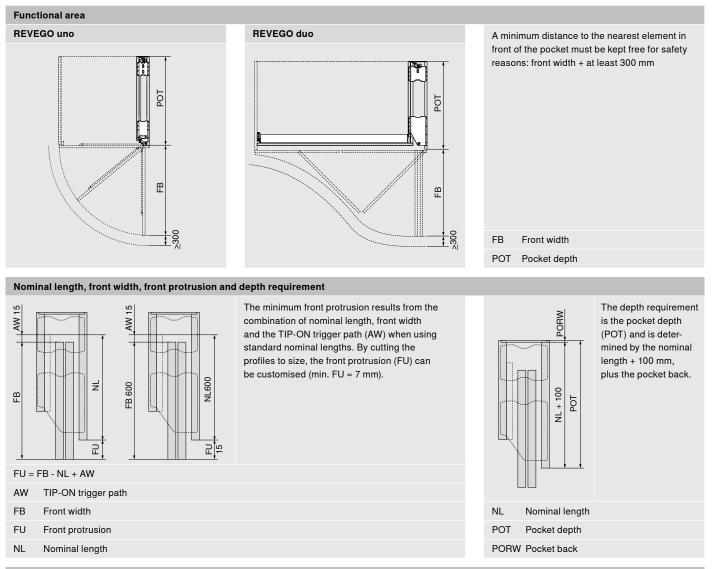

#### **Number of fronts**

Planning approach with a predefined number of fronts and fixed front widths. The number of fronts determines the choice of application. The predefined front widths are crucial for the installation width of the entire application. The fittings and cabinet dimensions within the application can be determined in the next step.

- 1. What number of fronts was selected? The number of fronts defines the type of application.
- 2. Desired front widths plus gaps determine the installation width.
- The pocket dimensions, front protrusion and internal dimensions within the application can now be defined on the planning pages of the respective application; the appropriate fittings can be selected.

blum

#### Planning approach and product selection

#### Note

- The internal dimensions within the application (width x height x depth) determine the maximum space available for the internal furniture.
- Design the widest front first for combined applications.
- Certified durability of 40,000 opening and closing cycles.
- The manual operating force is less than 70 N according to the durability test.
- Drilling patterns, cut-to-size dimensions and detailed parts lists can be found in the Product Configurator.

#### Assembly

- You will need a CNC machine or MINIPRESS top with EASYSTICK from Blum to machine the wooden parts.
   Please note that both horizontal drillings and a track cut-out will be needed.
- We recommend using the drilling template for REVEGO pocket connectors for the horizontal drillings.
- See appendix for calculation and assembly information for cutting profiles to size.

#### **Ablum**

#### Planning

FB = (EB - FsI - Fsm - Fsr) : 2 (fronts) FsI/Fsr = 1.0 - 4.0 mm; Fsm = 2.0 - 8.0 mm

Max. NL = FB + 8 mm

FU = FB - NL + 15 mm (min. FU = 7 mm)

#### Installation depth/pocket depth

ET = POT + FS (2 mm) + FD

FD = 18 – 26 mm

Min. POT = NL + POTV ( $\geq$  100 mm) + PORW ( $\geq$  3 mm)

POSD = 15 - 19 mm

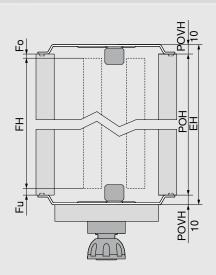

- By cutting the profiles to size, the front protrusion (FU) can be customised.
- To ensure optimum functionality, the fronts are at a slight angle inside the pocket.
   The internal width within the application determines the maximum width available
- for the internal furniture.
- With front thicknesses (FD) of more than 23 mm, the side gap (pocket side), the outside front radius and the inner radius of the external pocket side must be at least 3 mm.
- For front thicknesses (FD) less than 18 mm (possible depending on material/stability), we recommend a trial application.

EB	Installation width
ET	Installation depth
Fsl	Gap left
Fsr	Gap right
Fsm	Centre gap (between the fronts)
FB	Front width
FD	Front thickness
FS	Front gap
FU	Front protrusion
LWA	Internal width within the application
NL	Nominal length
POB	Pocket width
POT	Pocket depth
PORS	Pocket back cut
PORW	Pocket back
POSD	Pocket side thickness
POTV	Pocket depth loss
SS	Partition side (optional)

#### Planning

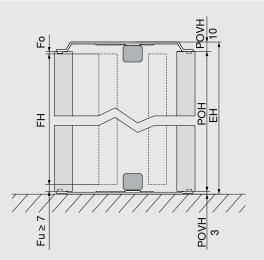

#### Installation height, front height

#### Application with plinth

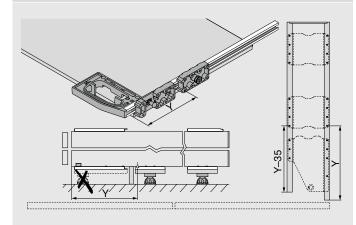

#### Installation height, front height

#### Application without plinth

#### Application with set-back plinth

Additional rear pocket connector

#### FH = POH - Fo - Fu

EH ≤ POH + POVH top and bottom

POH = FH + Fo + Fu

#### POVH 10 mm: gap 0 – 6 mm

- Take into account that the pocket must be tilted during installation
   Minimum distance from the front bottom edge to the floor 10 mm, to any cabinet above or below 6 mm
- Minimum plinth height 80 mm

EH	Installation height	
Fo	Тор дар	
Fu	Bottom dap	

- FH Front height
- POH Pocket height
- POVH Pocket connector height

#### FH = POH - Fo - Fu

 $EH \le POH + POVH$  top and bottom

POH = FH + Fo + Fu

POVH top 10 mm: gap 0 - 6 mm

POVH bottom 3 mm: gap from 7 - 13 mm

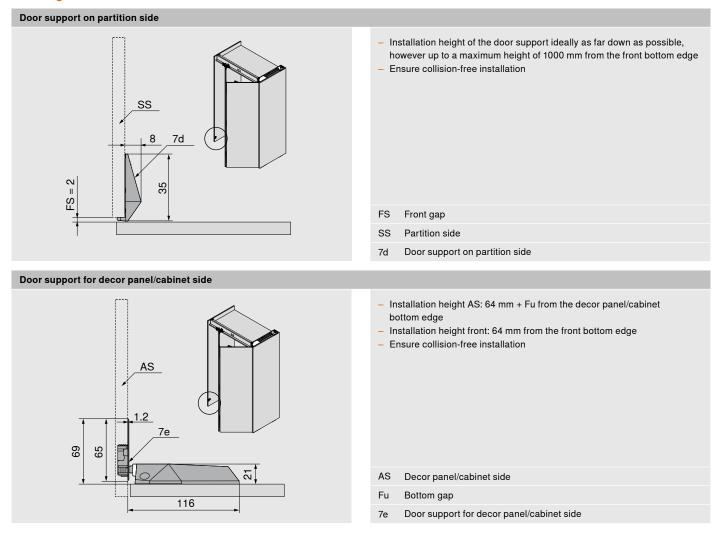

- Take into account that the pocket must be tilted during installation
- Minimum distance from the front bottom edge to the floor 10 mm, to any cabinet above or below 6 mm

EH	Installation height
Fo	Тор дар
Fu	Bottom gap
FH	Front height
POH	Pocket height

POVH Pocket connector height

Inter-door su	upport for REVEGO uno + uno	
44		800ZA02S
Consisting o	of:	
1 x Inte	r-door support (right + left)	

#### REVEGO uno + uno Single door, right and left

- Number of fronts: 2
- Installation width: 900 to 1800 mm
- Internal width within the application: up to 1600 mm
- Order all sets for each single door, 1x left and 1x right.

#### Planning

#### Installation depth/pocket depth

ET = POT + FS (2 mm) + FD

Min. POT = NL + POTV ( $\geq$  100 mm) + PORW ( $\geq$  3 mm)

#### Installation width/internal width within the application

EB = LWA + POB (100 mm)

FB = EB - FsI - Fsr FsI/Fsr = 1.0 – 4.0 mm

Max. NL = FB + 8 mm

FU = FB - NL + 15 mm (min. FU = 7 mm)

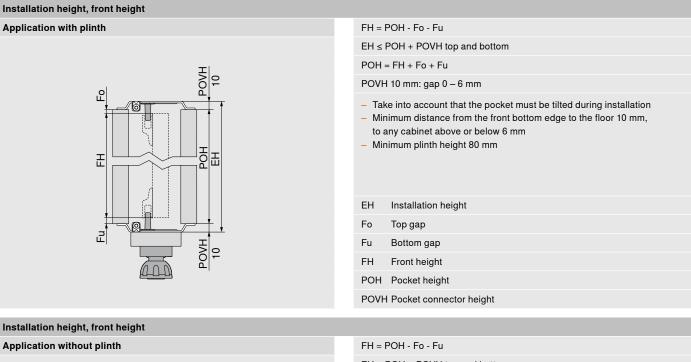

FD = 18 – 26 mm

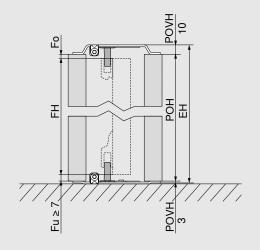

- By cutting the profiles to size, the front protrusion (FU) can be customised.
- To ensure optimum functionality, the fronts are at a slight angle inside the pocket.
- A partition side is required for a stand-alone application, or one adjacent to a worktop area.
   The internal width within the application determines the maximum width available
- for the internal furniture.
- With front thicknesses (FD) of more than 23 mm, the side gap (pocket side), the outside front radius and the inner radius of the external pocket side must be at least 3 mm.
- For front thicknesses (FD) less than 18 mm (possible depending on material/stability), we recommend a trial application.

EB	Installation width
ET	Installation depth

#### **EXPANDO T**

- EXPANDO T fixing system
- Thin fronts of 8 mm or more
- Different front materials

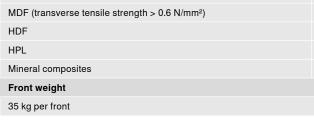

EXPANDO T is suitable for fixing Blum fittings to thin cabinet fronts of all types of materials. Front materials can be just 8 mm thick or more, provided they are sufficiently stable and strong.

> Mineral comp Front weight 35 kg per fror

#### Limitation of liability

Nm Minimum tightening torque

Blum accepts no liability for the use of EXPANDO T in combination with materials not listed or fittings from other manufacturers. It is recommended that assembly be carried out by an experienced furniture manufacturer.

Chipboard (transverse tensile strength > 0.4 N/mm<sup>2</sup>)

Find more information on assembly and adjustment of EXPANDO T at www.blum.com/expando-t-9 1.5

# moving ideas

Regardless of the ideas you have, we have the products and services to help you make them a reality. REVEGO inspires new approaches to design and furniture construction, creating a new feeling of space and a better quality of living. Our high quality pocket systems make planning and assembly easy for manufacturers and offer users completely new levels of convenience. Day after day.

# Quality of living

We would like you to enjoy greater convenience and functionality when using furniture.

# **Product range**

Everything from a single source: our wide range of products allows you to keep up with today's and tomorrow's trends.

## Inspiration

We monitor global trends and strive to create the solutions of tomorrow. We like to share our insights with you. **Innovation** We stay in motion. Curiosity

and pioneering spirit drive us to develop new products and services for you.

## **Services**

We support your daily operations with customised services tailored to your processes.

We continuously strive to improve our products, services and ourselves.

### Trust

We take responsibility for partnerships, our employees, society and the environment. Julius Blum started our journey in 1952 with horseshoe studs. Today we supply innovative fittings to customers in over 120 countries.
