# Product Configurator

The time-saving way to select, order and manufacture fittings

blum

Fittings selection, ordering and manufacturing made easy

Furniture planning has never been easier thanks to the Product Configurator by Blum. The Product Configurator is always up to date with the latest fittings and can be accessed online. You can create planning and manufacturing information such as cutting lists, assembly drawings and CAD/CAM data in no time. Configuration is easy and intuitive – even on your smartphone or tablet.

Benefit from comprehensive planning results from the Product Configurator

Collision-checked parts lists reviewed by the manufacturer to order from your distributor

Planning and design drawings detailing the dimensions, cuttings and drillings required for manufacturing

The right installation instructions and videos for your configuration

Save and manage your own configurations under "My projects"

Save your customised configurations in "My library" ready to be used again later as templates with your personal standard settings

Export CAD, CAM and BXF[1] data – for example to transfer to your semi- or fully automatic CNC machine or EASYSTICK

The complete configuration is available as a 3D preview. CAD data can be sent as a 3D configuration in a file to your design software or in CAM format to your CNC machine.

Product selection – the right fittings in just a few clicks

Guided product selection ensures you get the right fittings for your furniture project. Our Product Configurator can even help you with complex furniture designs and guides you step by step to create a collision-checked parts list.

Diverse planning results – for any working method

The comprehensive planning results provide production drawings that can be printed out as well as 2D or 3D CAD data for further processing in your design software. BXF[1] or special CAM data are ready for transfer to EASYSTICK and CNC machines. You can also quickly and easily create complete parts lists for product applications such as SPACE STEP, CABLOXX or SPACE TWIN.

Ordering made easy – send parts lists to selected distributors

You can manage our checked parts lists in customer projects and transfer them directly to your distributor's web shop in just a few clicks. There you will see your personal prices and the availability of the goods so you can finalise the purchase.

Want to find out more?
If you are interested in these services, get in touch with your contact at Blum.
We would be happy to advise you.

[1] The BXF file (Blum Exchange Format) not only contains information about the fitting, but also manufacturing information for wooden parts, such as cutting dimensions and drilling positions

How can the Product Configurator help me?

Savvy solutions are needed to meet the ever-increasing requirements related to high-quality furniture. That's why we offer you more than just well-thought-out fittings.
The Product Configurator is the ideal tool to support you with your furniture projects.

Advantages for cabinet makers

– Complete parts lists for error-free ordering
– Comprehensive planning results with information about design, manufacturing, assembly and adjustment
– All functions are also available for tablets and smartphones
– Intuitive, guided product selection complete with error-free parts lists with useful information about new products
– You can send your parts list directly to the web shops of selected distributors – individually or together as a production order using the "My order lists" feature

Advantages for hardware distributors

– Receive complete, checked parts list from your customers, allowing you to minimise ordering errors and expensive returns
– Integrate the Product Configurator directly into your web shop to help your customers select and order the right fittings more quickly and reliably
