Perfect motion for the up and over lift system

Combining easy opening with silent and effortless closing, AVENTOS HS turns an ordinary flap system into an awe-inspiring experience. The one-piece, large-area front silently swings up and over the cabinet providing easily-accessible storage space.

Wall cabinets are easy to open, thanks to the cleverly engineered light operating forces of AVENTOS HS. The variable stop ensures that the front always remains in the desired position. Thanks to BLUMOTION, the flap brakes gently and closes silently and effortlessly. The high-quality cover caps ensure a sleek, modern and harmonious appearance on the inside of the cabinet.

One programme that sets new benchmarks!

AVENTOS HS covers all available flap widths and heights:

- For cabinet widths up to 1800 mm
- For cabinet heights from 350 to 800 mm

i

Less effort for assembly and adjustment

Tool-free assembly and easy front removal, thanks to the CLIP mechanism.

The front can be adjusted in 3 dimensions. This enables you to precisely adjust the gap design.

The lift mechanisms can also be adjusted to the respective front weight (using the integrated calibration).
