

AVENTOS

lift systems

PRODUCT
MEMO

blum[®]

Lift systems are an ideal ergonomic solution for wall units. Fronts open upwards to provide unhindered access to the cabinet interior.

The AVENTOS lift system is not only easy to use, it is also simple to install. Even heavy frontals open and close silently and effortlessly thanks to the integrated BLUMOTION dampening system.

AVENTOS, in combination with **SERVO-DRIVE**, can be used to create handle less designs that are a perfect balance between beauty and efficiency.

AVENTOS HK stay lift units can be integrated with the **TIP-ON** mechanical opening support system to achieve the silky motion for which Blum is renowned.
