

YOUR PERSONAL TOUCH

Blum — the Austrian company feted for its innovative fittings for cabinetry work — has launched the sophisticated “Tandembox intivo” that offers plenty of design configurations for high-fronted pull-outs. This means, one can personalise a Tandembox design to blend with the interiors. What’s more, the drawer side profiles can either be finished with a cap in the same material as the drawer side profile or combined with an 8mm insert of glass, leather, plastic, wood or stone. Indeed the possibilities are limitless! Kiss goodbye to boring high-fronted pull-outs and welcome materials and colours such as silk white and terra black. With a multitude of options, your kitchen can be a very personal space! For enquiries call **Blum at 6547 1760** or visit the showroom at **150 Ubi Avenue 4, #02-00 Ubi Biz-Hub**.
