

A detailed illustration of a globe with various landmarks and the word "blum" repeated around it. The globe is shown from a perspective that includes the Americas, Europe, and Africa. Various landmarks are depicted, including the Empire State Building, the Eiffel Tower, the Colosseum, and the Great Wall of China. The word "blum" is written in a stylized font around the globe, appearing on a hot air balloon, a flag, and a banner. The globe is set against a dark blue background with a gradient of orange and yellow at the bottom.

FOR EVERY ONE, EVERY WHERE

With the
best insider
tips!

Around the world in 80 minutes

Welcome to the journey

At Blum, we make solutions for everyone, everywhere, in every corner of the globe. So join us as we take our cue from Jules Verne and embark on a voyage of discovery at interzum 2025 – around the world in just 80 minutes. We've packed everything you need for the trip, from new products for every part of the home to must-have services and international trends.

A travel guide is essential on any journey, so we've put together all our destinations here – as a handy guide for interzum and on the way back home.

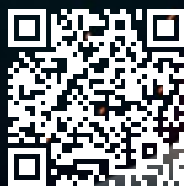

P.S. Keep an eye out for our insider tips and discover what inspires our customers all around the world!

Our itinerary

Before you start your journey, you'll want to plan out the best itinerary. With our map in hand, you can stay on course to discover the top destinations on our stand.

Our stops

For
bedrooms

Page 24

For
kitchens

Page 8

A circular illustration in a light brown color scheme depicting a modern living room. It features a low-profile sofa, a coffee table, a side table with a potted plant, and a wall-mounted picture frame. The text "For living rooms" is overlaid in white.

For living rooms

Page 38

A circular illustration in a light blue color scheme depicting a modern bathroom. It shows a bathtub, a sink with a mirror above it, and a potted plant on a shelf. The text "For bathrooms" is overlaid in white.

For bathrooms

Page 50

A circular illustration in an orange color scheme depicting a person sitting in a chair, looking at a laptop. Surrounding the person are various icons representing success and productivity, such as a clock, a shopping cart, a lightbulb, and a briefcase. The text "For your success" is overlaid in white.

For your success

Page 58

We'll be making a stop in kitchens, bedrooms, living rooms and bathrooms on six continents. We'll finish in the "For your success" area, where you'll see how our services can support you – now and into the future.

For kitchens

A teal-toned illustration of a kitchen cabinet. On top of the cabinet is a potted plant. A dashed white line curves across the middle of the image, starting from the left and ending on the right. At the start of the line is a white circle containing the number '1'. At the end of the line is a white circle containing the number '2'. Below the line, the word 'Rotterdam' is positioned under the '1' and 'São Paulo' is positioned under the '2'. The background is a solid teal color.

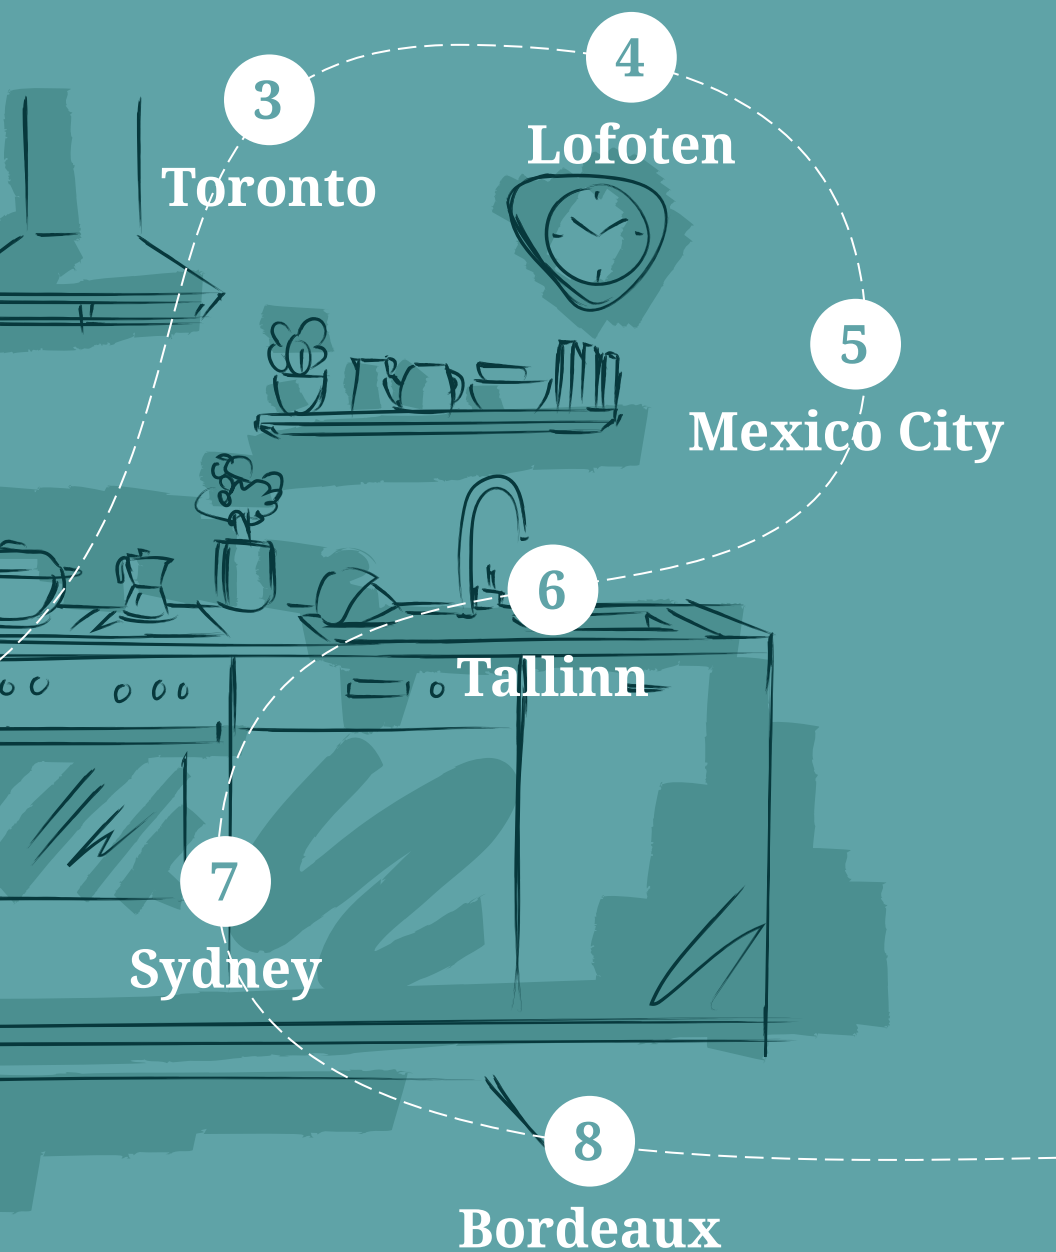

1

Rotterdam

2

São Paulo

Food brings people together in every culture, from Rotterdam to Mexico City and Sydney to Bordeaux. Products by Blum are designed to make the cooking experience simple, convivial and convenient in every kitchen.

1 Rotterdam, Netherlands

Perfect combinations

Home to the largest port in Europe, Rotterdam is a veritable melting pot of cultures. People here love coming up with exquisite combinations in the kitchen – but they don't stop at the ingredients.

A hot cup of Colombian coffee paired with a classic Dutch stroopwafel is as popular with long-time residents as with

new arrivals to the city. And it's ready to enjoy in no time, with the coffee machine gliding smoothly out of the kitchen cabinet on a pull-out shelf. Combined with AMPEROS AC, our innovative solution for electrifying furniture, the days of depending on a free socket are over.

REVEGO, our elegant pocket system, has another surprise in store. The kitchen can be quickly tucked away

AMPEROS AC available in Europe from autumn 2025

behind stylish cabinetry with a single touch on the slide-in doors in the side pockets. To open, simply press the closed front, and there's nothing more between you and the next break.

AMPEROS AC is so easy to install, and you don't need any special electrical skills.

Konrad de Boer | Cabinet Maker

Combined with a pull-out shelf, AMPEROS AC is the perfect solution for heavy electrical kitchen appliances.

Diversity with AVENTOS HKi

It's easy to open cabinet fronts when you're cooking. And close them again, so the kitchen looks neat and tidy.

Pnina de Carvalho | Designer

The next stop on our itinerary takes us to South America. São Paulo has a distinctly multicultural vibe – and that extends to the city's kitchens, too. AVENTOS HKi offers the design freedom to make it happen.

From food to fashion, international influences are everywhere you look in São Paulo, and kitchen design is no exception. Creating furniture to suit this style calls for a combination of tasteful

trends and premium components – like our ultra-slim lift system, AVENTOS HKi. Fully integrated into the cabinet side, AVENTOS HKi unleashes the ultimate in design freedom while still offering all the advantages of a conventional lift system, with opening angle stop, convenient 3-dimensional adjustment and the option to go handle-less with TIP-ON.

3 Toronto, Canada

The art of fine furniture: LEGRABOX individual

Design freedom is a dream that Toronto creatives never stop chasing. But the dream is already here, and it's called LEGRABOX individual.

Known as "Hollywood North", the city is a hub of the arts and filmmaking. Good design is a highly prized commodity here, including at home. It's a role LEGRABOX individual was born to play. The slender metal drawer sides of the box system set the stage, transforming even cabinet interiors into a work of art. Printing, laser texturing and embossing play a supporting role to one-of-a-kind designs.

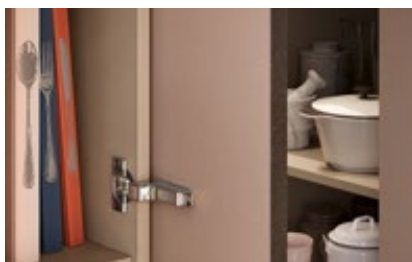

Could a box system have any more personality? We think not. This is LEGRABOX individual, the ultimate in individualisation.

Amazing hinge solutions

Scandinavian countries like Norway have a well-earned reputation for practical, minimalist kitchens. It all starts with the right hinges, but get ready for a surprising detail.

The hinges in this Norwegian kitchen have been installed to create a wow effect: the front opens inwards to reveal not a cabinet, but an entire pantry! This magic is made possible by a concealed access door. The hinge and mounting plate positions of the double cranked CLIP top BLUMOTION 110° hinges have been swapped round, so the door blends harmoniously into the design of the kitchen and swings elegantly inwards.

5 Mexico City, Mexico

Standard products, creative vibe

Coffee brings people together, both at home and in the office. In Mexico, a unique piece of furniture was developed as an homage to this much-loved beverage: the mobile coffee bar.

In Mexican coffee culture, a coffee break is an opportunity to exchange ideas and share a laugh – and that's how this creative combination of Blum standard products came about. Featuring the SPACE TWIN narrow cabinet solution, the LEGRABOX special edition box system in an elegant carbon look, plus a pull-out shelf with a lock-open stop, the mobile coffee station has space for a coffee machine, crockery and more. Equipped with SERVO-DRIVE, the pull-outs open with a single touch of the front. An integrated soft-close mechanism closes them again with a whisper – for a peaceful, relaxing break.

Timeless beauty in onyx black

Tallinn is a jewel in the crown of northern Europe. A place of enduring beauty, the historic old town shines in particular. Blum makes possible furniture designs of equal beauty with hinges that also come in onyx black.

Dark furniture is the epitome of elegance, both inside and out. Our hinges in onyx black meld seamlessly into dark surfaces while creating fascinating contrasts on light-coloured furniture.

If you can imagine it, you can do it. All of our popular hinge types are also available in onyx black and are compatible with our integrated soft-close mechanism

BLUMOTION, making them the perfect choice for practically any situation – both in form and in function.

Blum hinges in onyx black meet the highest standards of quality and durability.

Dark furniture remains in vogue, and hinges in onyx black really take it to the next level.

Irina Saar | Interior Designer

Clear your head with AVENTOS top

Looking to clear your head in Sydney? Just grab a surf board and ride those beautiful blue-green waves. And if you want to do the same in the kitchen, AVENTOS top is your answer.

Freedom of movement is a big advantage with the AVENTOS lift system family. Depending on the model, furniture fronts pivot up, swing up and over, lift up or fold up and out of the way – for hassle-free cooking!

Thin fronts are also an option with AVENTOS HS top and cross stabilisers are no longer needed for wide fronts.

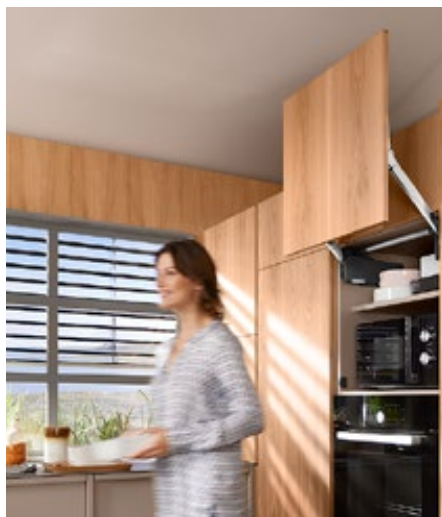

With AVENTOS HF top, you can get creative with a mix of materials. This lift system can now be used up to a cabinet height of 1200 mm.

AVENTOS HL top is the perfect way to conceal large kitchen appliances such as a microwave.

With the introduction of AVENTOS top, Blum has further improved its family of lift systems for the benefit of manufacturers. The streamlined range, consisting of AVENTOS HF top, AVENTOS HS top, AVENTOS HL top and AVENTOS HK top, is quick and easy to install and can be combined as needed. This is possible thanks to a uniform design and standardised lift mechanism fixing positions. The optimisations also save on warehousing space. All lift systems are also available with BLUMOTION for soft and effortless closing as well as the SERVO-DRIVE electrical opening support system.

The perfect wave: SERVO-DRIVE

Let's stay a while longer in Australia and catch another wave. Surfing is a sport that goes with the flow, and as such is the perfect metaphor for the motion of our SERVO-DRIVE electrical opening support system.

After all, pull-outs and wall cabinets fitted with SERVO-DRIVE open with the same elegant flow as the waves on Sydney's beaches. And now we've made it better than ever. Not just in terms of the modern dark grey colour for all

SERVO-DRIVE models, but also in the inner workings and ease of installation. We've also made sure the standby power consumption is well below the level mandated in the EU.

Assembly follows the usual process for all models, but the system is even quicker and easier to install now thanks to clearer labelling with a QR code and an LED status indicator that signals the correct installation depth.

SERVO-DRIVE update available
from September 2025

The waste bin pull-out is the most used pull-out in the kitchen – so my customers love SERVO-DRIVE uno.

Luca Davis | Cabinet Maker

The perfect setting: easily adjust the trigger sensitivity of SERVO-DRIVE for box and runner systems.

SERVO-DRIVE flex, the electrical system for opening handle-less refrigerators and freezers, automatically adapts to the weight of the front during start-up.

MERIVOBX: the right ingredient for the kitchen

When a dish comes "à la Bordelaise", it's bound to be delicious – because people in Bordeaux know a thing or two about cooking. So it's no wonder that MERIVOBX really shines in the kitchens here.

A good cook will create multiple one-of-a-kind dishes with the same ingredients. Much like MERIVOBX. This box system is based on a modular platform, so you can create a wide range of different

options with just a few components. At the heart of MERIVOBX is the cabinet profile with the same fixing position for every application, making it easy to use and install the system while streamlining inventory management.

And for kitchen users, the big advantage is that the drawer side is straight on the inside, leaving plenty of space for ingredients and utensils.

Every version of MERIVOBX can be implemented quickly and easily thanks to the modular concept.

Its characteristic look with clear lines and a unique design gives MERIVOBX pure a distinctive appearance.

**MERIVOBX
fronts always
have the same
drilling pattern.
The system is
simplicity itself.**

Pascal Bertrand | Cabinet Maker

For bedrooms

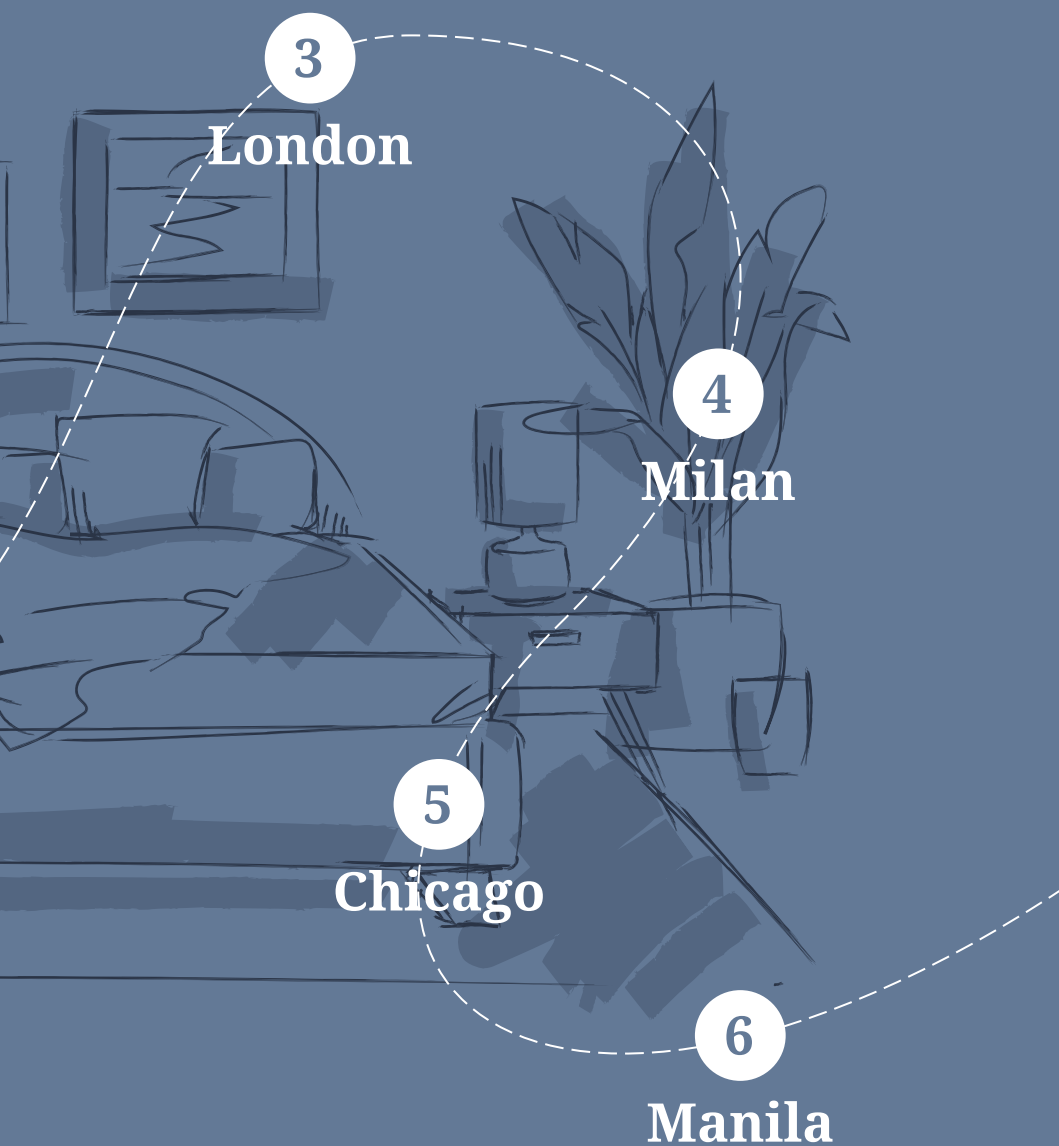

1

Istanbul

2

Jakarta

When a bedroom is tidy, it instantly feels like a calmer, more pleasant place to be – be it in the mountains, the city or on a tropical island.

1 Istanbul, Türkiye

PLICOBX: our new box system

Fold. Push. Done. Life is fast in the growing metropolis of Istanbul – and so is PLICOBX. The new box system by Blum has the same take on life as Gen Z.

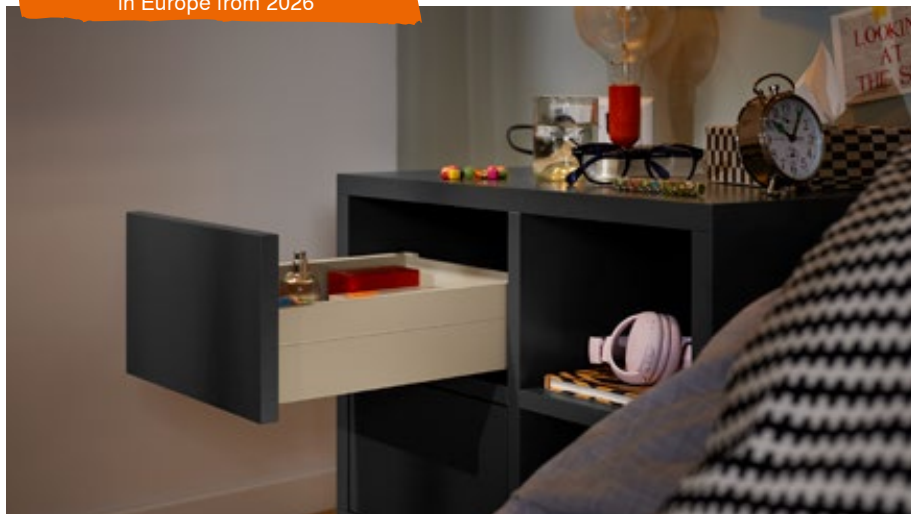

It's all about speed and practicality. Young people in vibrant cities like Istanbul don't want to spend a lot of time putting together their furniture, and convenience is key. PLICOBX gets it. This box is ready to go in no time – with the

minimum of tools. Its revolutionary folding base (base and back in one) makes assembly a breeze. The new box system was specifically designed for living areas like the bedroom. It comes with full, 7/8 or single extension and creates plenty of storage space in bedside cabinets and wardrobes thanks to straight drawer sides.

PLICOBX is the speedy way to assemble bedroom furniture – and all with the customary high Blum quality.

PLICOBX is expected to be available for select OEM customers in Europe from 2026

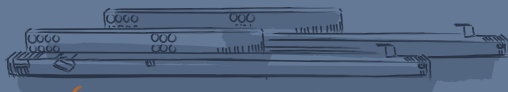

The folding base is a back and base in one – I've never assembled a box this quickly before.

Salih Yavuz | Design Engineer

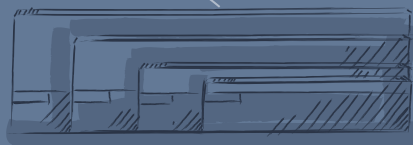

I packed my bag and in it I put ... PLICOBX

If we want to send off PLICOBX as a practical flat-pack kit, we need to take care to include everything that's needed.

2x cabinet profiles

PLICOBX cabinet profiles are based on our tried and tested TANDEM runner system and have a feather-light glide.

2x drawer sides

The straight drawer sides come in the colours silk white matt, pyrite beige and carbon black matt.

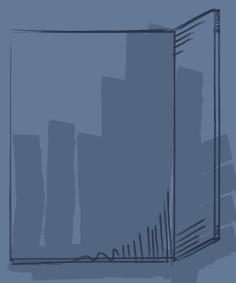

www.blum.com/pbx03

1x (compact) folding base

The revolutionary folding base is both the base and back of the box in one. This combination and the base support provide the necessary stability.

2x front fixing brackets

We offer three types of front fixing: INSERTA, the "classic" screw-on version or EXPANDO T.

A handful of screws

PLICOBX needs no screws, aside from those for fixing the cabinet profiles.

2 Jakarta, Indonesia

A world of possibilities with M BLUMOTION 105°

M BLUMOTION 105° available
in selected markets only

M BLUMOTION 105° with integrated soft close is a versatile all-rounder.

As a country of 17,508 islands, the diversity of Indonesia's landscapes is paralleled only by the number of possible applications of M BLUMOTION 105°: the latest hinge from Blum is perfect for anywhere in the home.

M BLUMOTION 105° has been pared down to the essentials. Soft-close BLUMOTION has been integrated into the boss to provide top quality motion.

Installation is easy, making it the perfect hinge for flat-pack furniture or creative DIY projects. And thanks to exceptional manufacturing quality, M BLUMOTION 105° is the right choice for furniture throughout the home: from the bathroom to the kitchen, and from the living room to the utility room.

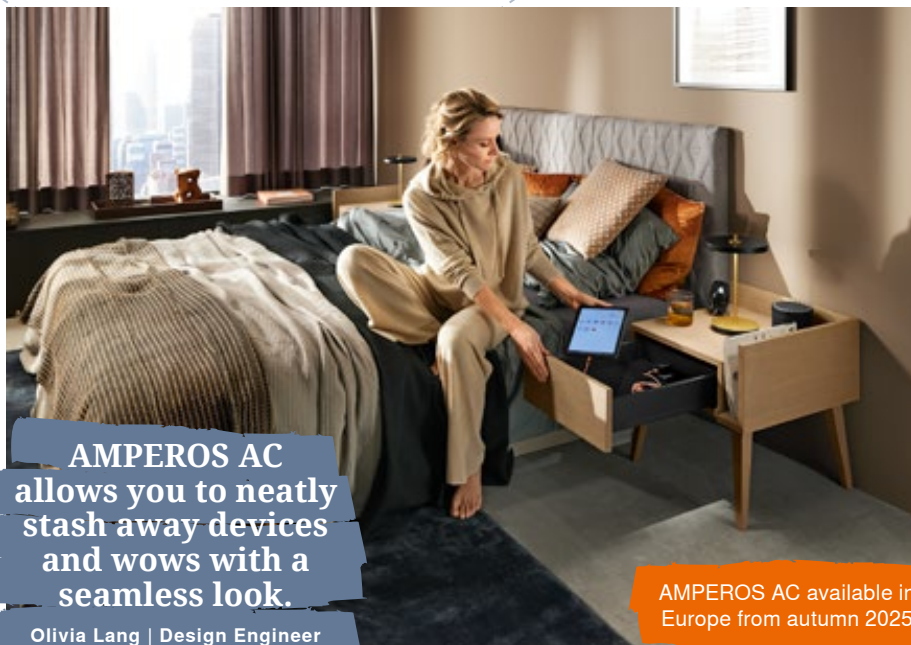

In Jakarta, the largest city in South-East Asia, straightforward solutions for the essentials are the name of the game.

I prefer to use EXPANDO split dowels to fit the hinge. I pre-attach the front, it holds in place and then it's easy to tighten the screws.

Abdul Yani | Furniture Fitter

Dream team: AMPEROS AC and LEGRABOX

AMPEROS AC allows you to neatly stash away devices and wows with a seamless look.

Olivia Lang | Design Engineer

AMPEROS AC available in Europe from autumn 2025

London is home to a huge range of attractions, from Big Ben to Buckingham Palace. There's so much to see and do that, come evening, you really need a restful place to relax.

AMPEROS AC power outlets in black matt and the LEGRABOX pure box system in carbon black matt are a match made in heaven. So when visitors kick off their shoes and unwind after a hectic day in the UK's capital, they can give their mobile phones and tablets a rest

and recharge in drawers, too. With not a single cable in sight.

AMPEROS AC can also be combined with the MOVENTO runner system. It comes in black matt and glossy white.

4 Milan, Italy

AVENTOS HKi: design and la dolce vita

Looking for design inspiration for your home? Then head to Milan: the global design mecca flourishes with new ideas. AVENTOS HKi impresses in the bedroom – as do installation concepts in workshops.

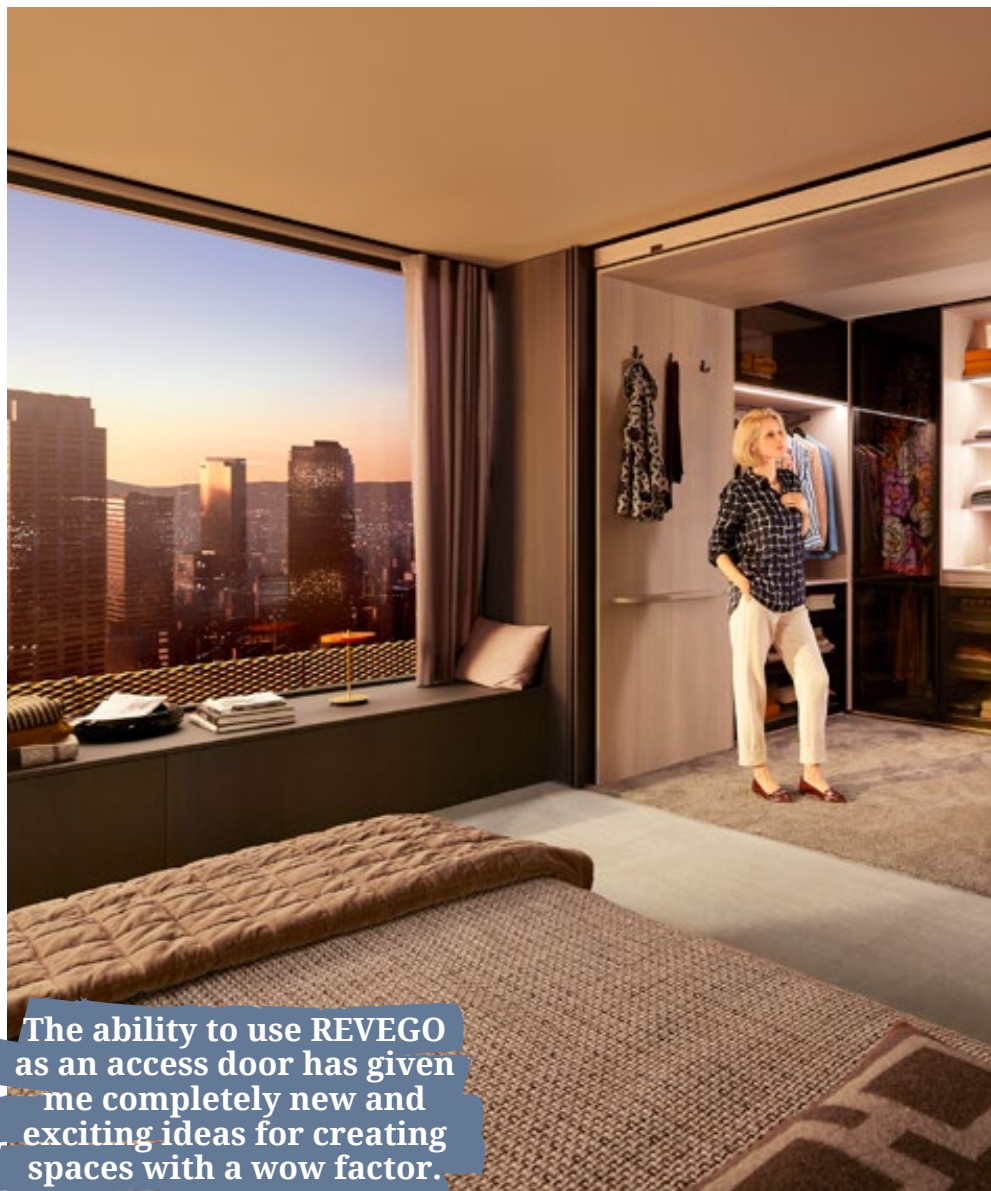

There's practically no limit to the design possibilities offered by our integrated stay lift AVENTOS HKi, but the manufacturing options are certainly worth a mention too. La dolce vita is about enjoying life: MINIMILL speeds up large quantity jobs, giving you more time for what matters. And precision routing templates

and pre-routed MDF raw boards are also offered to make manufacturing quick and easy. Life can be so simple.

5 Chicago, USA

Opening up new perspectives with REVEGO

The ability to use REVEGO as an access door has given me completely new and exciting ideas for creating spaces with a wow factor.

Jennie Cook | Interior Designer

Chicago's skyline makes for an incredible view. But upon closer inspection, you'll see that REVEGO is just as stunning.

What looks like a wall is a floor-to-ceiling door that opens with a single touch. The 2025 model update takes the REVEGO pocket system to the next design level. As this walk-in dressing room in Chicago shows, the slide-in door system from Blum can be used as an access door without any internal cabinetry. Only the side pockets are essential as they conceal the bi-fold doors. The motion technology has been further optimised for a feather-light glide. And assembly is now even easier.

Runner systems: as flexible as life itself

Manila is a colourful, vibrant and exciting place. In the capital of the Philippines, you'll find something new around every corner. This city never stops – just like the runner systems from Blum.

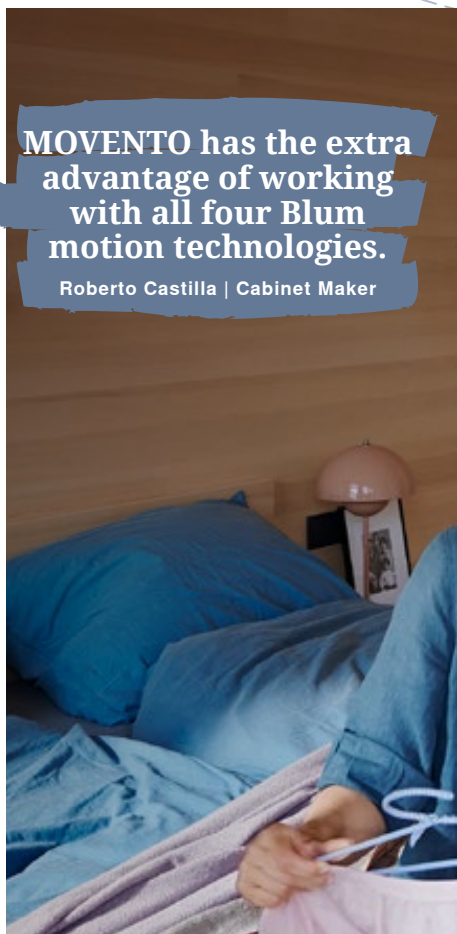

Our TANDEM and MOVENTO runner systems allow you to create custom drawers made of all kinds of wood – just perfect for the diverse bedroom designs of Manila.

TANDEM is particularly versatile. The concealed runner system can take a maximum load of 30 kg and is available as a full or single extension. MOVENTO, meanwhile, is the ultimate in sophistication, featuring ultra-smooth running action along with impressive stability and a high load bearing capacity. The full extension boasts 4-dimensional adjustment options to ensure perfect gap alignment and an incredible look.

**MOVENTO has the extra
advantage of working
with all four Blum
motion technologies.**

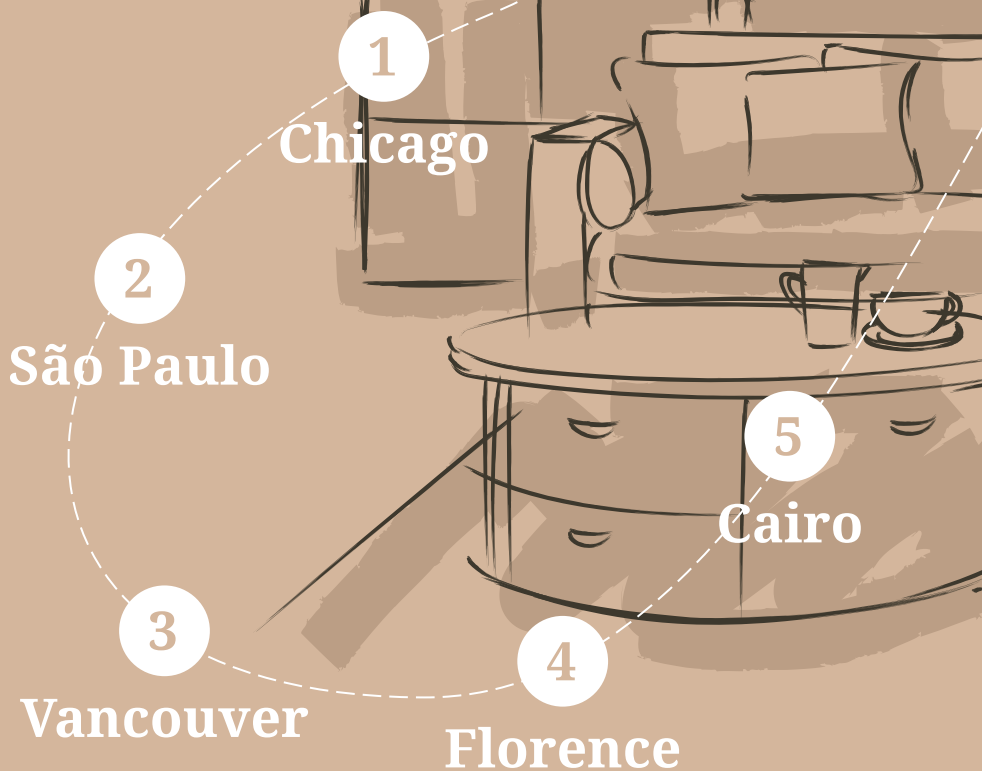

Roberto Castilla | Cabinet Maker

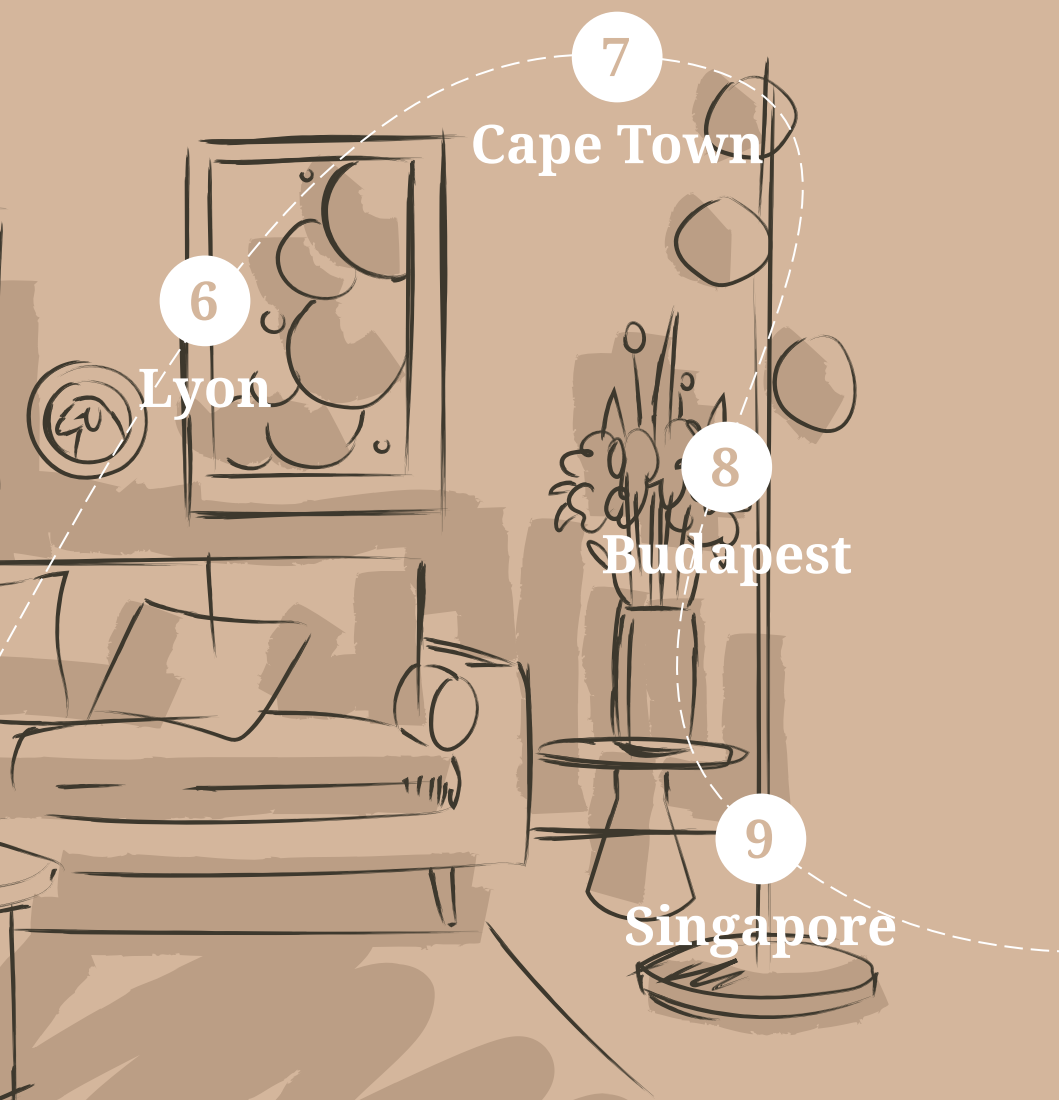

Runner systems by Blum are a great fit for practically any application – from the wardrobe to the bedside cabinet.

For living rooms

Next up on our itinerary are living rooms around the world. In many cultures, this is where everyone comes together: and practical, elegant solutions by Blum make this an even cosier place to be.

1 Chicago, USA

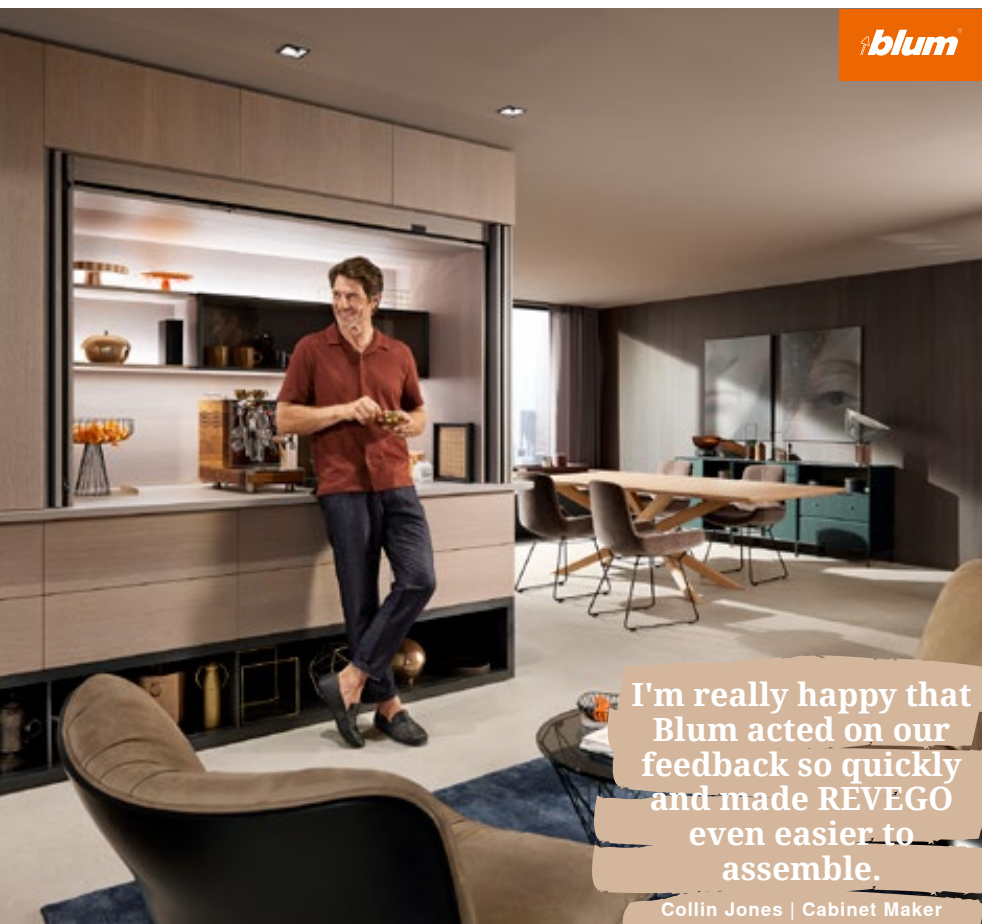

The secret behind REVEGO

Let's go back to Chicago and take another look at the exciting perspectives opened up by REVEGO, this time in the living room.

Thanks to the latest update, REVEGO is now available for front heights from 1130 to 2980 mm, so the pocket system can also be used to create mid-height solutions. A worktop-mounted cabinet is one great option for tucking away smaller items behind the flexible wall. If you don't want that stylish coffee and tea station always on display, simply close it away. The drawers underneath remain just as accessible as before. The new version of the pocket system also impresses with optimised ease of use, top quality motion and simplified assembly.

From airy lofts to compact urban apartments, REVEGO creates space with style.

I'm really happy that
Blum acted on our
feedback so quickly
and made REVEGO
even easier to
assemble.

Collin Jones | Cabinet Maker

Simply touch the front, and REVEGO opens
and closes with a feather-light glide.

AVENTOS HKi: showcasing beauty

We've already paid a visit to the kitchens of São Paulo. Next up are the city's living rooms, where AVENTOS HKi, our integrated lift system, is just as impressive.

The living rooms of São Paulo have a spacious feel and feature straight lines, natural materials and the deliberate use

of glass – with a touch of Brazilian flair. In other words, the perfect environment for AVENTOS HKi. Paired with glass fronts with a thin aluminium frame, the fitting is practically invisible when closed, making AVENTOS HKi perfect for showcasing bespoke cabinetry and prized possessions. Invisible yet stunning, in any home.

3 Vancouver, Canada

Statement-making hinges

The way we work has changed. A prime example of this can be seen in the living rooms of Vancouver, one of Canada's start-up hotspots, where a dedicated area for working from home is a must in many households.

When the Canadian winter turns especially cold, the younger generation prefers to work from home. Fortunately, Blum has a range of extremely practical

solutions at the ready for home offices in particular, like a small space for office supplies or power outlets concealed behind a front fitted with double cranked hinges. After all, if your workspace is in the middle of the living room, it has to be both practical and look great. From elegant mitred applications to profile/thick doors, Blum hinges are made for attractive solutions, and statement-making design.

PLICOBX – slimline and elegant

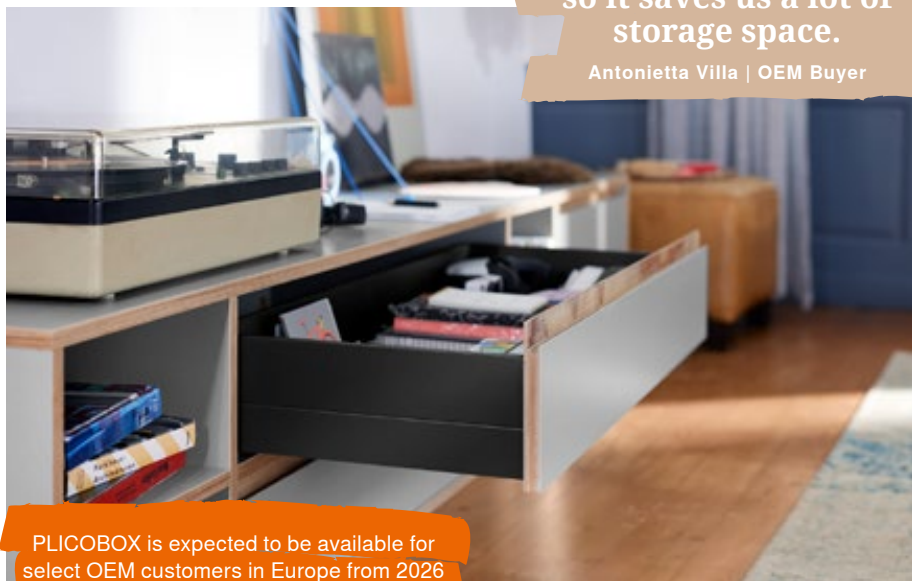

Benvenuti a Firenze! The city of art and culture wishes you a warm welcome. Could anything be a better fit for the living rooms of Florence than our elegant PLICOBX?

Slim drawer sides, a choice of three timeless colours and stylish design: PLICOBX is as classy as they come. But like Florence itself, the new box system by Blum isn't just lovely to look at. Delivered in a practical flat-pack package, the box system for drawers, sideboards and wardrobes cuts down on costs and is easy to store and ship.

PLICOBX comes with minimal packaging, so it saves us a lot of storage space.

Antonietta Villa | OEM Buyer

PLICOBX is expected to be available for select OEM customers in Europe from 2026

M BLUMOTION 105° available
in selected markets only

5 Cairo, Egypt

Inspiring solutions with M BLUMOTION 105°

Only a few minutes lie between the pyramids and skyscrapers of Cairo, a city that blends Egyptian history with modern influences in many respects – including interior design. Provided you have the right hinges, of course.

In Cairo, natural materials and classical elements meet modern technology and timeless design. This unique marriage

is achieved with the help of Blum's new M BLUMOTION 105° hinge. Designed with fewer parts, the hinge has a compact and slim design without sacrificing functionality and convenience. It features easy 3-dimensional front adjustment and proven integrated soft-close BLUMOTION. It's perfect for cabinets and sideboards with front thicknesses of up to approx. 24 mm, such as in the living room.

LEGRABOX special edition: hidden wonders

With LEGRABOX, I can bring all my ideas to life. And the elegant colours are a perfect match for my requirements.

Sylvie Lambert | Cabinet Maker

"What is essential is invisible to the eye." While Lyon native Antoine de Saint-Exupéry might not have been describing a pull-out with closed sides, he certainly captured the spirit of LEGRABOX to perfection.

At first glance, it looks like a conventional chest of drawers in the living room. But take a closer look and you will discover its elegant interior. This is LEGRABOX special edition, featuring a selection of four extraordinary decorative elements for the outer drawer side and cool black matt for the interior. It's a special collection designed for stylish, elegant furniture and is part of the LEGRABOX

range. And the AMBIA-LINE inner dividing system helps to keep things elegant. Compatible with LEGRABOX, it's organisation at its best.

7 Cape Town, South Africa

Home office with AVENTOS HK top

Multifunctional living rooms are on trend. So let's stop in Cape Town and check out how cleverly AVENTOS top combines working and living space.

Stay lifts like AVENTOS HK top are ideal for office furniture. The wall cabinet front lifts up and out of the way and can be left open while working. This compact solution has the flexibility to support small and large heavy fronts alike, and is compatible with the TIP-ON opening support system.

Another great option is to combine it with LEGRABOX and a pull-out shelf – for a home office that does even more. And the living room office is quickly magicked away with the REVEGO pocket system, creating space for entertaining guests.

MERIVOBX: a crystal-clear combination

Along with an abundance of historic buildings, Budapest is a hotspot for contemporary architecture. Glass often plays a decisive role here – as does the glass design element for MERIVOBX.

Glass adds a perfect touch to that characteristic MERIVOBX look, creating surprising visual effects when light is

reflected on the drawer side. The box system's smooth transitions are a key feature of the harmonious design – for virtually seamless pull-outs. If you're looking to freshen things up, you can also go with different materials for the design element. But MERIVOBX doesn't just look great; this box system is also as durable as it gets thanks to an L-shaped cabinet profile.

Fitted with glass design elements, MERIVOBX modular with BOXCOVER captures the light and creates a classy impression.

CLIP top BLUMOTION 105°
available in selected markets only

blum

9 Singapore

Compact quality: CLIP top BLUMOTION 105°

When it comes to merging efficiency with compact design, our new CLIP top BLUMOTION 105° hinge takes its cues from Singapore.

Covering just 730 sq. km, this city-state manages to squeeze office complexes, shopping malls, universities and schools, recreational facilities and hawker centres

full of culinary delights into a very limited area.

Singapore is all about compact quality, which also describes our new CLIP top BLUMOTION 105° hinge. Equipped with the proven CLIP mechanism, this hinge boasts a sleek, minimalist and compact design. The built-in soft-close mechanism is just as effective as always.

For bath- rooms

A bathroom is so much more than just a room. Depending on different cultural and personal preferences, it might be a spa-like oasis, a quiet retreat or a practical washroom. Or all of these at once. Fortunately, Blum has the right products for every requirement.

A blue-toned line drawing of a bathroom. It features a sink with a faucet, a mirror, a towel rack with a towel, a toilet, and a shelf with a plant and bottles. A dashed white line connects three numbered circles (1, 2, 3) to different parts of the room. Circle 1 is near the mirror, circle 2 is near the toilet, and circle 3 is near the towel rack.

1

Lisbon

2

Tallinn

3

Copenhagen

Discover the unexpected with AMPEROS AC

With its yellow trams, blue-tiled walls and wrought iron balconies, Lisbon can't help but evoke a sense of nostalgia. But the Portuguese metropolis isn't just a place to ponder the past; it's also packed with cutting-edge technology – and sometimes where you least expect it.

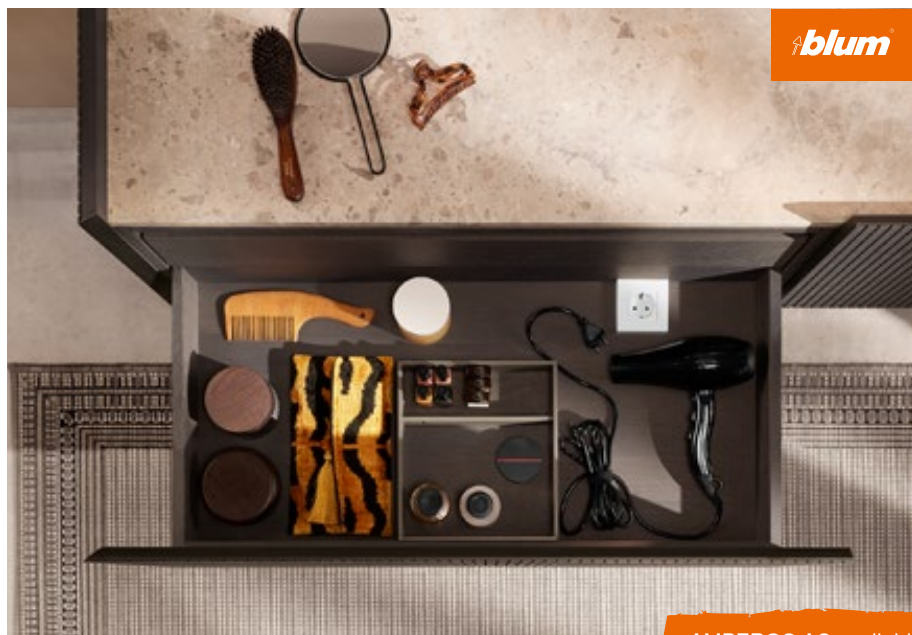

Tucked away behind traditional façades tiled with azulejos, Lisbon's interiors are also surprisingly fresh and innovative. In

the bathroom, for example, hidden away in the drawer, you will find AMPEROS AC, our simple and safe solution for power-integrated furniture. Thanks to the power outlet inside the drawer, electrical appliances can be kept tidied away, properly charged and ready for use. After all, organisation is half the battle – whether in Lisbon or your home.

AMPEROS AC really enhances my furniture with the integrated power supply. Best of all, everything is kept neat and tidy!

Michele Mendes | End User

blum

AMPEROS AC available in Europe from autumn 2025

AMPEROS AC powers and charges devices like razors, hair dryers and electric toothbrushes directly in the drawer.

For bathrooms 53

Onyx black for striking contrasts

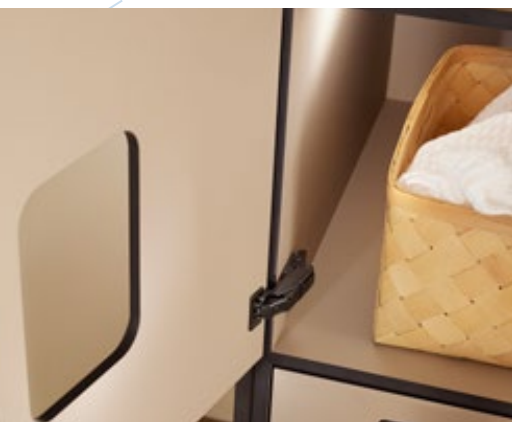

Our hosts in Tallinn have also opted for onyx black hinges in the bathroom, adding stylish accents to the design.

In the kitchen, the hinges in onyx black blend discreetly into the dark furniture. But in the bathroom, they catch the eye, creating a visual contrast to the

light-coloured finishes. Even the functional utility unit for the washing machine looks sleek and sophisticated. Paired with the EXPANDO T fixing method, the hinges can also be used with hard, water-resistant materials – perfect for the bathroom or the utility room.

Wide angled applications are also available in onyx black for cabinets with a large opening angle.

Special fixing technologies make our hinges in onyx black suitable for a wide range of materials.

I can use the hinges as easily as ever, and my customers love the new colour.

Andrei Kask | Cabinet Maker

MERIVOBX: one principle, many applications

Danish interior design is characterised by minimalism and clean lines and puts practicality and quality first. So MERIVOBX fits the bill perfectly.

The modular box system by Blum works beautifully with the Danes' practical design style. Whether in the practical SPACE TOWER, Blum's flexible cabinet

solution for tons of storage space in the bathroom, or in the under-sink cabinet with a concealed inner pull-out – this box system's modular design makes it easy to implement many different applications and system heights. And the result is almost as seamless as the creations built with the beloved snap-together blocks from Denmark.

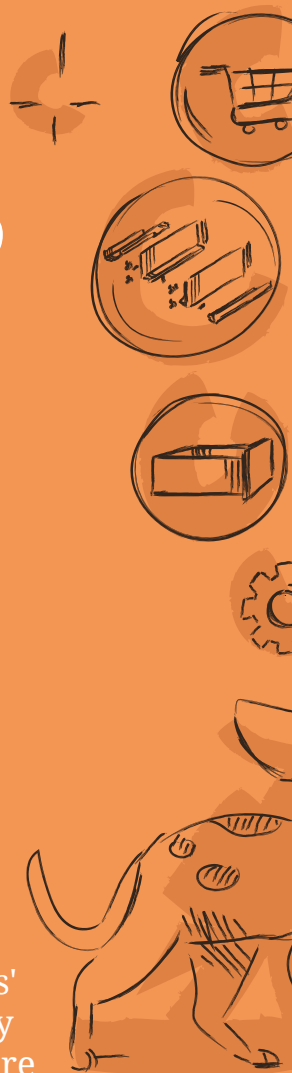

Cargo bikes do it all on the streets of Copenhagen. Our MERIVOBX box system does the same in the bathroom.

For your success

Your success is what drives us. So how do we achieve this goal? With products and services that perfectly meet our customers' needs and make the difference for you day after day. But we also think about the future and are already working on solutions that will meet the challenges of tomorrow.

Our services for a perfect trip

It's great to have a beautiful hotel but that alone won't make for a perfect trip. A lot more goes into it. We at Blum couldn't agree more. Our products are complemented by a wide range of services to enable our customers' success.

Digital services

Our digital services beat any travel app, supporting our customers along the entire process chain.

Logistics services

We make sure you're packed for the journey, with customised packaging, automated ordering processes and optimised storage.

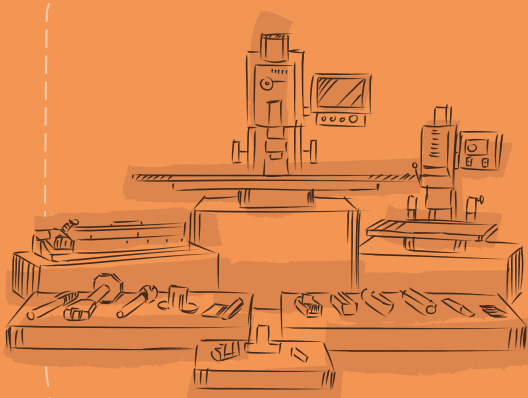

Communication services

We offer the right materials for targeted marketing – tailored to the respective market, in over 40 languages.

Assembly devices

There are different travel adapters for different countries, and different tools for different jobs. You name it, Blum's got it – from templates to assembly equipment.

Personal services

Conversation brings people together, be it on travels or in day-to-day business. That's why we attach great importance to personal advice, comprehensive support and a wide range of training opportunities.

The background is a solid orange color. On the right side, there are minimalist line art illustrations of a mountain range and some trees. The mountains are drawn with simple black outlines and have some light orange shading. The trees are also simple line art, with some having light orange foliage. The text is in a white, serif font, positioned on the left side of the image.

After the
journey is
before the
journey.

We're already
looking ahead
to what's next.

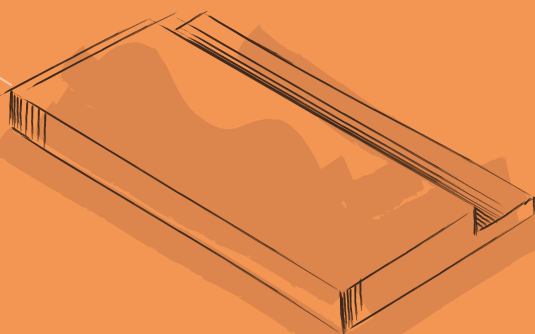

The journey continues.

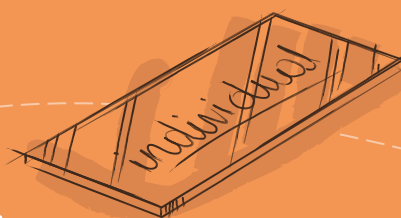

How to increase efficiency and offer custom solutions? It's a challenge we all face. The "Blum Beyond Components" brand delivers concepts that do precisely that. Our mission is to simplify your success – along the entire value added chain. As a solutions provider we go beyond components and work towards a shared future.

*Simplifying
your success!*

Flat-pack kit: precision and convenience

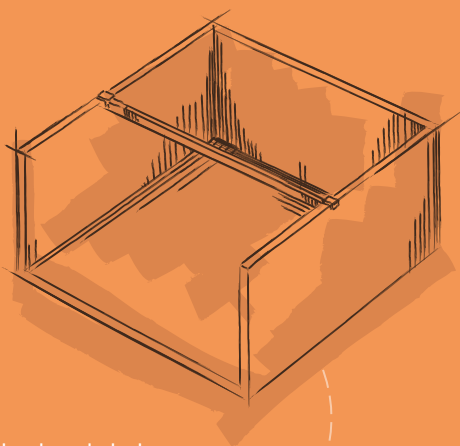

We develop flat-pack solutions that combine high-quality fittings with wooden parts cut precisely to size in a compact set. Designed for efficiency and easy assembly, our kits simplify the whole process from delivery to installation.

Unique: more choice for you

We push the boundaries so we can offer even more individuality, flexibility and personalised solutions – because every project deserves a made-to-measure solution.

BOX complete: ready right away

Our service for pre-assembled box systems is already being used by the first customers. This plug-and-play solution was developed to save time and effort and is a game changer for the installation process.
